TRU-DOT is a registered trademark of Meprolight. TRU-DOT sights are protected under U.S. Patent 5,359,800 and have a 12-year illumination warranty to the original purchaser. Reflex sights have a 10-year illumination warranty to the original purchaser. Meprolight night sights and optical systems are available at Kimber Master Dealers across America, as well as directly through Kimber. Several wholesale distributors also distribute Meprolight.

The Low-Light Advantage™

Meprolight® sights have established a worldwide reputation for exceptional brightness and durability. The first manufacturer of Tritium sights to receive the prestigious ISO 9002 certification, Meprolight supplies many firearm manufacturers with night sights for their production guns. Kimber, Glock, H&K, Kahr, Mossberg, Remington and Benelli trust Meprolight sights because they are the best.

Meprolight sights are backed by the strongest warranty in the business. More importantly, they are 20% brighter than other brands. Critical design features include light tubes that are sealed with a patented bonded process which makes them impervious to solvents and oils. Front dots are deliberately brighter than rear dots, encouraging focus on front sight and beyond. Meprolight is the right sight in any light.

25 Years of Bright Ideas

Over 5,000,000 Sets In Use Worldwide

Optical Sights & Accessories

The M-21 is a maintenance-free, dual-illuminated reflex sight that encourages quick and accurate instinctive shooting. This advanced sight is ideal for close quarters, where shooting with both eyes open is critical. The M-21 works without batteries. Illumination of the aiming point is by fiber optics during daylight and Tritium at night. Transition is immediate and automatic, ensuring excellent contrast between the aiming point and target.

MX-3

ML96200

The MX-3 mounts behind the M-21 and provides 3X magnification between the aiming point and target.

Rifle & Shotgun Sights

Meprolight night sights greatly enhance the usability of rifles and pistols by providing 24-hour aiming points.
