

# Compact CDP II™

### Features:

- Built entirely in the Kimber Custom Shop.
- Stainless steel slide with Carry Melt™ treatment for rounded and blended edges.
- 4-inch match grade bushingless bull barrel and shorter grip aids concealability.
- 30 lines-per-inch checkering on the front strap and under the trigger guard.
- Light weight 7075-T7 aluminum frame with premium KimPro II® finish.

The Compact CDP II™ .45 ACP is one of two Kimber 1911 pistols that combine the short grip length of an Ultra Carry with the longer 4-inch barrel of a Pro Carry. Built entirely in the Kimber Custom Shop, features like night sights, ambidextrous thumb safety and 30 LPI checkering on the front strap and under the trigger guard are standard. The 4-inch bushingless bull barrel has a match grade chamber and is fitted directly to the slide. A Carry Melt™ treatment rounds and blends edges so they do not snag clothing or holsters, and the ejection port is beveled so brass clears easily. Other important additions include a match grade trigger, stainless steel small parts, checkered mainspring housing and elegant double diamond rosewood grips. Adding these features while the pistol is being built reduces the price by over \$500, making it an incredible value. Quality, dependability and power are everything in a carry pistol. The Compact CDP II proves that blending features does not necessarily mean compromise.

The Compact CDP II™ is a high performance hybrid. The short grip length makes it easier to conceal but the 4-inch barrel gives a longer sight radius for better accuracy and increased velocity.

CDP pistols are made entirely in the Kimber Custom Shop. Standard features include low-profile three dot (green) night sights and a Carry Melt™ treatment that rounds and blends edges so they cannot snag on clothing or holsters.

All CDP pistols have 30 lines-per-inch checkering on the front strap and under the trigger guard for a positive grip with wet or cold hands. Standard features include ambidextrous thumb safety and Premium Aluminum Trigger.™

# Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD® SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD® SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

## Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

## Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.

## Compact CDP II™ Specifications

Caliber	Item #	MSRP
.45 ACP	3200056	\$1,318

Height (90° to barrel)	4.75 inches
Weight (with empty magazine)	27 ounces
