

Stainless Pro Carry II™

The Stainless Pro Carry II™ .45 ACP is one of Kimber's finest all-around carry and duty pistols. The 4-inch bull barrel makes it easy to conceal, and light weight makes it easy to carry for long periods of time. Meprolight® 3-dot (green) night sights ensure fast target acquisition in periods of low light, and the surrounding white collars stand out in daylight. The stainless steel slide and aluminum frame do not reflect light and are also resistant to the elements. Like all Kimber pistols, it features a match grade barrel, chamber and trigger for unequaled accuracy. The single action trigger breaks at 4–5 pounds without the creep and overtravel common to other designs, and the 1911 safety system has never been equaled. The full-length grip aids in controlling recoil, and also accepts standard magazines. The Stainless Pro Carry II also fits almost any hand and points naturally, improving both speed and accuracy.

Features:

- Weighs just 28 ounces for easy all-day carry.
- Meprolight night sights allow fast low-light target acquisition.
- 4-inch match grade bushingless bull barrel ensures accuracy.
- Stainless steel slide and aluminum frame resist the elements.
- Beveled magazine well for quick and positive loading.

Kimber Low Profile Combat™ Meprolight® night sights are securely mounted in machined dovetails. Meprolight sights are 20% brighter than other brands and backed by the strongest warranty in the business.

Light weight 7075-T7 aluminum frame has been tested to over 20,000 rounds without evidence of meaningful wear. At just 28 ounces, this pistol is easy to carry.

The 4-inch match grade barrel is fitted directly to the slide, keeping weight forward. Muzzle lift is reduced, encouraging faster sight recovery during rapid fire.

Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD™ SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD™ SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.
