

Custom Covert II™

Features:

- Crimson Trace Lasergrips in digital camouflage with Kimber logo.
- Weight is just 31 ounces for easy carry.
- Features include lanyard ring and magazine with extended bumper.
- Bumped beavertail grip safety with memory grooves for positive, repeatable grip position.
- Match grade barrel, barrel bushing, chamber and trigger.

The Custom Covert II™ .45 ACP from the Kimber Custom Shop™ is loaded with specialized carry features like 30 lines-per-inch checkering with bordered base on the front strap. Even though it is a full size pistol, light weight makes it easy to carry—and rounded edges on both slide and frame ensure it will not hang up on clothing or holsters. Crimson Trace Lasergrips with digital camouflage pattern and Tactical Wedge three dot (green) Meprolight® night sights combine to ensure a positive aiming point even in extreme low light. Lasergrips are a \$369 value when purchased separately, and are powered by two #2032 lithium batteries with over 4 hours run time. Standard Kimber features include match grade barrel, chamber and trigger for unequaled accuracy, and beveled magazine well for quick and positive loading. The Custom Covert II is ideal for duty carry, and also one of the best choices of any pistol available today for personal defense.

Covert pistols feature Crimson Trace Lasergrips in digital camouflage with the Kimber logo. Lasergrips promote faster shooting and are tremendous training aids.

Covert pistols are light weight. Frames are machined from solid aluminum and wear desert KimPro II™, a premium finish that is both self-lubricating and resistant to the elements.

Tactical Wedge night sights, 30 lines-per-inch front strap checkering and beavertail grip safety are standard. Covert pistols are made in the Kimber Custom Shop™ where they are fit and finished by hand.

Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD® SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD® SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.
