

Desert Warrior®

Features:

- Integral Kimber Tactical Rail™ for accessory mounting.
- Premium KimPro II® finish is self-lubricating and protects against the elements.
- Service Melt™ treatment rounds edges to prevent snags on clothing or holsters.
- Bumped and grooved beavertail grip safety encourages proper grip position.
- Short (military length) guide rod for quick field stripping.

Based on the specialized pistols built for a detachment of United States Marines assigned to Central Command, the Desert Warrior™ .45 ACP serves equally well for duty and defense. It is tough, absolutely dependable and very accurate. Both slide and frame are machined from solid steel and wear Desert Tan KimPro II®, a non-reflective finish that is self-lubricating and extremely resistant to wear, salt and the elements. The Desert Warrior also has an extended ambidextrous thumb safety, plus a short (military length) guide rod for fast takedown. Kimber G-10 grip panels ensure a positive grip regardless of conditions, and a lanyard ring offers additional retention options. Standard Kimber features like match grade barrel, chamber, trigger and barrel bushing ensure unequalled accuracy. Warrior pistols include a 7-round magazine with extended bumper for fast, positive loading, as well as an extended ambidextrous thumb safety that allows fast operation with either hand. The best pistol to carry is a 1911, and the best 1911 is a Kimber.

The Desert Warrior wears the KimPro II® finish in Desert tan. Tough and self-lubricating, KimPro II has outstanding resistance to chemicals, moisture, salt and UV light that can break down other finishes.

Warrior pistols have Kimber G-10 grip panels and a traditional lanyard loop. Other standard Warrior features include a short or military-length guide rod, along with a bumped and grooved beavertail grip safety.

Tactical Wedge™ three dot (green) night sights from Meprolight® are securely mounted in machined dovetails. They provide a fast and positive sight picture, regardless of light conditions, and are backed by a 12-year illumination warranty.

Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD® SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD® SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.

Desert Warrior® Specifications

<u>Caliber</u>	<u>Item #</u>	<u>MSRP</u>
.45 ACP	3000126.....	\$1,458

Height (90° to barrel).....	5.25 inches
