

Gold Combat Stainless II™

Features:

- Stainless steel slide and frame with non-reflective satin finish.
- Special night sights with cocking shoulder for one-hand cycling.
- Stainless steel match grade bull barrel ensures accuracy.
- 24 lines-per-inch checkering on the front strap for secure grip.
- Extended and beveled magazine well for fast reloading.

The Gold Combat Stainless II™ .45 ACP is the finest full-size stainless steel pistol available from Kimber. Built entirely in the Kimber Custom Shop™, it is fully outfitted with specialized features for carry and defense. The stainless steel match grade bull barrel has a match grade chamber, deep crown and is fitted directly to the slide. The slide itself features beveled French shoulders, serrated flat top and a rear night sight with aggressive cocking shoulder for one-hand cycling if necessary. The frame has special bordered 24 LPI checkering on the front strap with 30 LPI under the high cut trigger guard. With an elegant non-reflective satin finish, the Gold Combat Stainless II is ready for a lifetime of service. Additional features include ambidextrous thumb safety, narrow slide serrations, match grade trigger and extended beveled magazine well.

Gold Combat models feature a serrated flat top slide, premium match grade trigger and night sights with cocking shoulder for one-hand cycling if necessary. Scalloped French shoulders elegantly blend the bottom of the slide into the frame.

Built in the Kimber Custom Shop, the Gold Combat Stainless II is loaded with custom features like a hand-fitted 5-inch stainless steel bushingless match grade bull barrel and fine cocking serrations.

Herringbone-pattern Micarta grip panels, special 24 lines-per-inch front strap checkering with bordered base and high cut under the trigger guard for best grip position during rapid fire are all standard.

Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD® SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD® SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.
