

# Stainless Ultra Raptor II™

## Features:

- Premium 7075-T7 aluminum frame. Pistol weighs just 25 ounces.
- Stainless steel slide. Bushingless 3-inch bull barrel for accuracy.
- Ramped barrel and polished breech face ensure dependable feeding.
- Tactical Wedge three dot (green) night sights for low light performance.
- Self-lubricating and moisture-resistant KimPro II finish on frame.

The Stainless Ultra Raptor II™ .45 ACP is a compact, light weight 1911 ideal for concealed carry, but the dynamic Raptor treatments make it stand out. Scaled slide serrations, front strap and zebra wood grips combine with a feathered flat top slide for a striking appearance.

Made in the Kimber Custom Shop™, features include match grade barrel, chamber and trigger for unequaled accuracy, lowered and flared ejection port for dependable extraction and beveled magazine well for fast and positive loading. The 7075-T7 aluminum frame is finished in KimPro II®, which is both self-lubricating and extremely resistant to moisture and salt. Built to last several lifetimes, these frames have been tested to 20,000 rounds without showing evidence of meaningful wear. While the 3-inch barrel, short grip frame and light weight make the Stainless Ultra Raptor II easy to carry and conceal, it will be hard to keep it tucked away. This one begs to be admired.

Built in the Kimber Custom Shop™, Raptor pistols have scaled slide serrations, Tactical Wedge™ night sights, ambidextrous thumb safety, bumped and grooved beavertail grip safety and a match grade trigger.

Raptor pistols have a flat top slide with a back-cut feathered row of scales running the full length. Barrel, chamber and trigger are match grade for unequaled accuracy. Ejection port is lowered and flared for absolute reliability.

Raptor pistols have unique Kimber logo grips with a bordered scale pattern that carry the design theme (Patent D5607505), as well as scaled front straps. Both ensure a positive grip even with cold, wet or gloved hands.

## Kimber. The Choice of America's Best.

America's best shooters keep choosing Kimber. Legendary LAPD® SWAT tested five major 1911 brands and chose Kimber. United States Marines assigned to Special Operations Command chose Kimber. The U.S.A. Shooting Rapid Fire Pistol Team trains for Olympic competition with a Kimber. Most recently, LAPD® SIS transitioned to Kimber. They all chose Kimber for the same reasons; quality, dependability and accuracy. So should you.

A Kimber 1911 is superior to any other semiautomatic pistol design:

- Light & crisp single action trigger pull.
- Two external safeties for additional security.
- Fits almost any size hand.
- Ergonomic grip for natural pointability.

### Standard Kimber Features:

Kimber pistols have a match grade barrel machined from solid steel. This ensures unequaled accuracy regardless of caliber, plus long barrel life.

A match grade chamber allows each pistol to realize its accuracy potential. Ejection ports are lowered and flared so ejecting brass clears easily.

Match grade triggers break crisp and clean with a pull weight of 4–5 pounds. There is no long take-up, heavy pull or overtravel like other semiautomatic designs.

Kimber pistols feature premium fixed, adjustable or night sight sets securely mounted in dovetails machined into the slide. All Kimber sights are steel for durability.

### Made in America.

Kimber builds the world's best 1911 pistols right here in America. Every critical component is manufactured inside the Kimber factory. The finest raw materials come through the front gate and Kimber does the rest, the only way to ensure that every part meets unequaled standards.

### Stainless Ultra Raptor II™ Specifications

Caliber	Item #	MSRP
.45 ACP	3200196	\$1,359

Height (90° to barrel)	4.75 inches
