*Kimber*®

WHAT ALL GUNS SHOULD BE™

OWN SOMETHING LEGENDARY.

Kimber®

For over four decades Kimber has etched a name for itself in the world of firearms. From humble beginnings in Oregon to state of the art manufacturing in Alabama, Kimber pistols and rifles are the gold standard due to our hand-fit craftsmanship and relentless reliability. Our products are built to the highest specifications of elite military-service members and the most discerning enthusiasts. When you expect the finest, you look for a Kimber.

**BECAUSE A KIMBER IS WHAT ALL GUNS SHOULD BE™.**

# HANDGUN SELECTION GUIDE

## MICRO & MICRO 9

**MICRO™** and **MICRO 9™** pistols include many proven 1911 design elements that make them comfortable to carry, safe to operate, and easy to shoot accurately. With a starting weight of 13.4 ounces in the Micro, 15.6 ounces in the Micro 9, and barrel length of 2.75 inches in the Micro and 3.15 inches in the Micro 9, they are well-suited for concealed carry. With a mild .380 ACP recoil in the Micro and a manageable 9mm recoil in the Micro 9, both are ideal sub-compact carry guns.

- ▶ Short barrels and thin profiles ensure concealability
- ▶ Lightweight and easy to carry
- ▶ Smaller grip dimensions provide a good fit for all hand sizes

## ULTRA

**ULTRA™** models are easy to conceal and comfortable to carry due to the guns' 3-inch bull barrels and short grips. Most frames are made from aluminum to reduce weight. While light pistols do have a slight increase in recoil, this is minimized by Kimber's recoil system and unequalled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality helps ensure this does not compromise dependability or accuracy.

- ▶ 3-Inch barrel length for easy concealment
- ▶ Short grip for concealability and comfortable carry
- ▶ Most Ultra models weigh 25 ounces
- ▶ Available in 2 calibers

## K6s & K6xs

**K6s™** models have a 6-round capacity, compact frame and cylinder, and a 2- to 4-inch barrel. Edges are rounded and blended so it is less likely to snag on clothing. For those that require power in a slim package, the revolver models fit the bill as they all have a 6-round cylinder housed in a small or extra small frame. This makes them well suited for backup or concealed carry.

- ▶ Compact, 6-round capacity cylinder
- ▶ Ergonomic grip design for easily controlled recoil
- ▶ Available .38 SPL/.357 Mag. or .38 SPL +P

## PRO

**PRO™** models may be the best all-around 1911 configuration, combining a 4-inch barrel with a full-length grip. An ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames, while others have heavier steel frames. Two models include the Kimber Tactical Rail™ for mounting lights and accessories. All Pro models have a near-perfect balance that makes shooting the pistols easy, accurate and fun.

- ▶ 4-Inch barrel length to optimize balance and concealability
- ▶ Full-length grip fits shooters with larger hands
- ▶ Frame options permit a model selection that meets multiple needs
- ▶ Available in 2 calibers

## SUGGESTED USE ICONS

Below and on the following pages you will find a suggested use based on the size and features of each gun. This icon does not necessarily mean a certain firearm is not suitable for other uses. Visit our website or call our customer service staff for questions.

**CARRY**  
The features and size of these firearms are well-suited for personal defense situations.

**HOME DEFENSE**  
The features and size of these firearms are well-suited for in-home defense.

**MULTIPLE USE**  
These firearms are suitable for use in a variety of spaces, in and outside of the home.

**TARGET**  
Topped with adjustable sights, these 1911s are well-suited for competition or a day at the range.

**LE**  
The features on these firearms make them an excellent choice for duty carry.

**HUNT**  
These models are well-suited for backcountry camp protection and handgun hunting.

## KDS9c

**KDS9c** models have a 4.09-inch barrel in a single-action, all-metal platform. Chambered in 9mm and shipping with two 15-round magazines, the KDS9c pistols were built from the ground up as a personal protection masterpiece. The KDS9c has a reversible magazine release for left or right-handed shooters and a crisp 3.5-4.5lb trigger pull comes standard.

- ▶ 15 + 1 round capacity. 10-round magazines also available.
- ▶ All-metal construction weighing only 25.3 ounces
- ▶ Available in 9mm

## R7 MAKO

**R7 MAKO™** models have a 3.37 inch barrel built into a modular polymer striker-fired system. Shipping with both an 11-round and 13-round magazine, the R7 Mako pistols are an excellent combination of the time-tested steel and polymer construction in an ultra-reliable, striker-fired platform. At just 19.5 ounces, the R7 Mako has fully ambidextrous controls and full wrap-around stippled texturing.

- ▶ Ships with 11- and 13-round magazines
- ▶ Weighing only 19.5 ounces without the magazine
- ▶ Available in 9mm

## CUSTOM

**CUSTOM™** models are full-size 1911 pistols featuring a 5-inch barrel and full-length grip. The most popular configuration, Custom models are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, the pistols are easier to shoot accurately and have reduced recoil. The slim profile and outstanding 1911 ergonomics make them well suited for duty, personal defense and general use.

- ▶ Full-length grip fits shooters with larger hands
- ▶ 5-Inch barrel length for improved velocity and accuracy
- ▶ Wide selection of models for any application
- ▶ Available in 4 calibers

## LS

**LS** models are full-size 1911 pistols featuring a 6-inch barrel and full-length grip. An ideal configuration for competition or as a hunting sidearm, the Long Slide 1911s are a popular platform at the range and in the field because of the pistols' inherent accuracy and recoil-reducing weight.

- ▶ 6-Inch barrel length for optimal velocity and accuracy
- ▶ Various models feature custom-level features such as porting, optics, adjustable sights, and a round-heel frame
- ▶ Available in 2 calibers

Each of these pistols overlays the image of a custom-size 1911 for comparison.

Each of these pistols overlays the image of a custom-size 1911 for comparison.

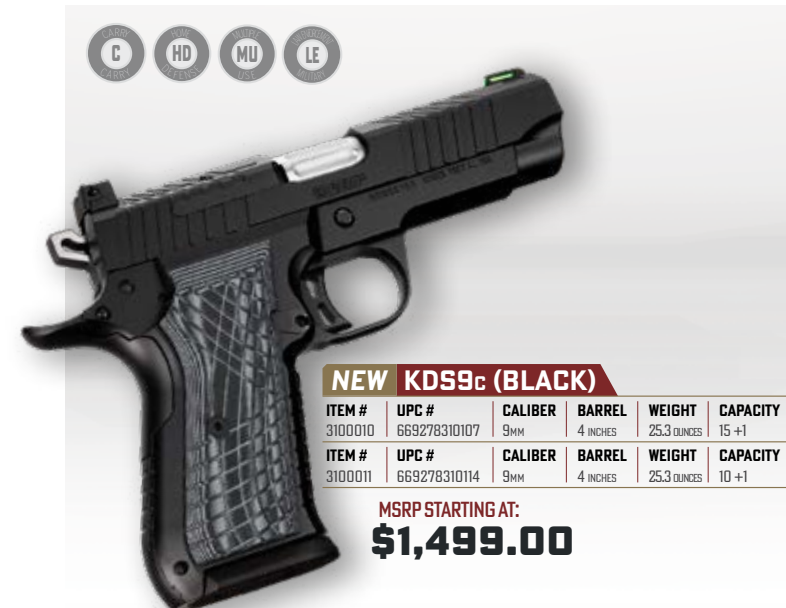

## NEW PRODUCTS

### KDS9c

The new KDS9c from Kimber is a testament to over four decades of the highest level of firearms manufacturing. The KDS9c was built from the ground up as a personal protection masterpiece. The barrel is fully fluted, crowned, and ramped. Our proprietary bore sizing process delivers match-grade accuracy with every shot. Our engineers specified 7075 aerospace-grade aluminum to develop the frame featuring a fully integrated cross-hatch

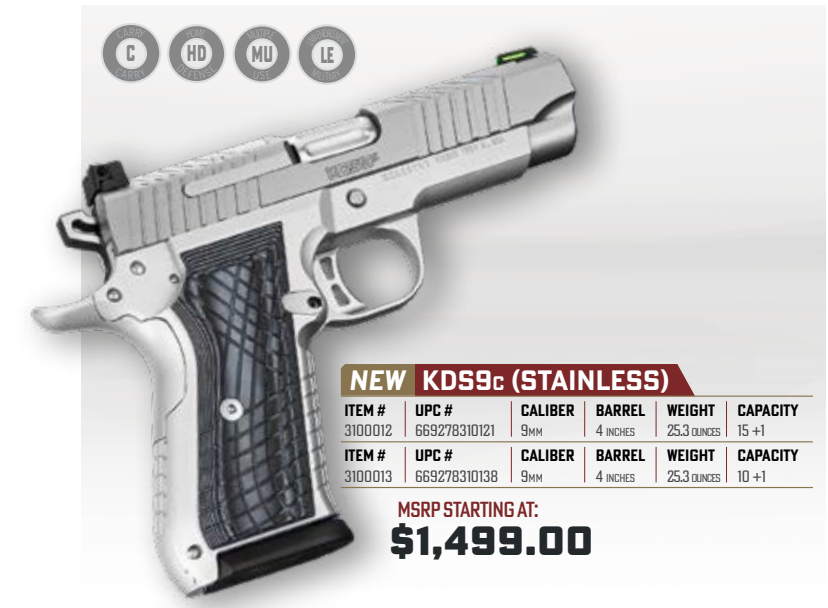

textured design for the front and the back strap that flows with the grip to deliver superior grip ergonomics. The magazine release is reversible for left and right-handed shooters. A crisp 3.5-4.5lb trigger pull comes standard, as well as two 15-round magazines, which anchor the KDS9c as the premier personal protection platform that enhances your ability to defend yourself no matter the situation.

HIGH-CONTRAST FRONT SIGHT

EXTRA SMALL, LIGHT-WEIGHT ALUMINUM FRAME

HOGUE® COBBLESTONE RUBBER GRIP W/ LOGO

SMOOTH, NON-STACKING DA ONLY TRIGGER

## K6xs

The K6xs™ is an extra small, ultra-lightweight revolver with all the features of its larger framed sibling, the K6s™. The K6xs™ uses the same lightweight, non-stacking trigger system as the K6s™. It also features a fluted glass-bead finish cylinder and barrel slot cut further to lighten the K6xs™ for the perfect carry weight. It is the lightest K6s ever and offers something others in its category don't: a six-round capacity.

Built specifically for concealed carry and chambered in .38 SPL +P, the aluminum alloy frame and fluted cylinder keep the revolver's total weight under a pound (15.9 ounces). The K6xs™ wears a silver KimPro II finish on the frame and a glass-bead finish on the 2-inch, stainless-steel barrel. The Hogue rubber Cobblestone grips with finger grooves make it comfortable to shoot.

## RAPIDE

The Rapide boasts performance-enhancing features that make it an ideal target pistol, such as stepped cocking serrations, slide-lightening cuts for faster slide-lockup time, flush-fitting extended magwell, new V-Cut™ match-grade trigger—breaking crisply at 4-5 lbs. The Rapide Heat features

a DLC-coated barrel for extreme durability, while the Rapide Ice features a stainless barrel. These features are coupled with the standard attributes found across the Kimber 1911 Custom platform.

# 1911 PISTOLS

**ALL 1911s AREN'T CREATED EQUAL.** Kimber® builds the world's best factory 1911 pistols to the highest tolerances possible, right here in America. Those facts alone set us apart from so many others, but the differences run deeper. We only choose the highest-quality raw materials; that's our foundation for success. We manufacture every critical component in our Kimber factories; getting it right means doing it yourself. Finally, all parts are fitted together by hand; there's simply no other way to make a Kimber. It's why America's best shooters, including legendary SWAT units and United States Marines assigned to the U.S. Special Operations Command, have chosen Kimber: We'll never settle for what anyone else could make.

# AEGIS ELITE

## MODELS

## AEGIS ELITE

Aegis Elite has round-heel frames, finished in KimPro® II silver and two-tone styling, and is completed with G-10 Cyclone-patterned grips, making these pistols particularly useful in target-shooting scenarios. AEX-pattern serrations are a stylish answer to the practical need for grip surface during reloads. The Aegis Elite features fiber-optic sights

on the Ultra, Pro, and Custom models, while the Optics Installed (OI) Pro and Custom models have the Vortex® Venom® Red Dot with a 6 MOA dot, milled and installed before leaving Kimber. Remaining true to Kimber's original purpose, this puts an otherwise custom gun within reach of every shooter's hands.

CDP  
MODELS

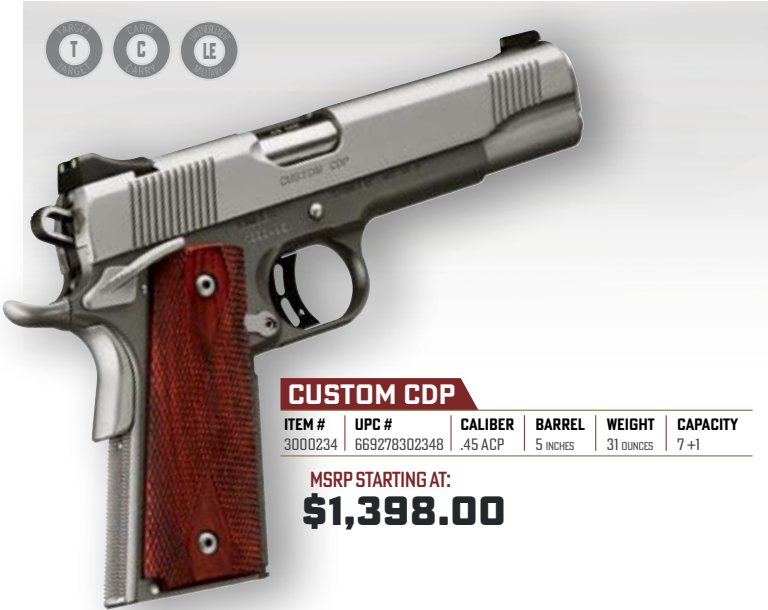

CDP

The CDP™ (Custom Defense Package) pistols combine all the best carry features into a package that gives the pistol its name, making them an incredible value. Featuring tritium night sights mounted on a stainless-steel, flat-top slide. The lightweight aluminum frame has 30 LPI checkering on the front strap and under the trigger guard. The frame, slide, and small

parts wear our KimPro® II finishes. The Carry Melt™ treatment rounds and blends edges to prevent snagging on clothing. The Ultra-sized pistol features a round-heel frame and flush-cut barrel. CDP pistols have no equal for carry and defense—just what you expect from Kimber.

3-DOT TRITIUM SIGHTS

ROSEWOOD GRIPS

CARRY MELT™ TREATMENT

# COVERT (LG) MODELS

## COVERT (LG)

The Covert™ .45 ACP pistols have the perfect combination of lightweight, meaningful features. Covert pistols feature a gray color palette, flush-cut barrel, and a round-heel frame on the Ultra models, as well as both the Crimson Trace Laser grips® and Tactical Wedge tritium night sights—two sight systems that create a sight picture regardless of light conditions. The 30 LPI front strap checkering ensures a positive grip even with cold, wet, or gloved hands. The Carry

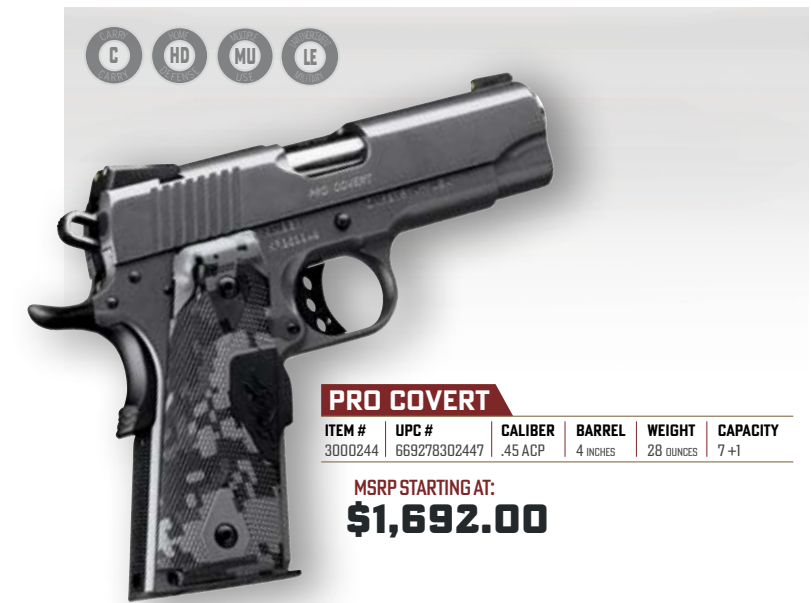

Melt™ treatment contours, rounds, and blends edges so it won't snag. A bumped and grooved beavertail grip safety provides control under stress, while the mainspring housing with a lanyard slot on the Custom and Pro models adds an extra safeguard if needed. Kimber's Covert quality ensures unequaled accuracy and dependability—there is no reason to be afraid of the dark.

# RAPTOR II

## MODELS

### RAPTOR II

Raptor™ II pistols take their name from a combination of aggressive slide and frame serrations, feathered logo grips, and special-scaled texturing accents. While this patented design is unique, the features, dependability, and accuracy are pure Kimber. Tritium night sights, ambidextrous thumb safety, and a bumped-and-grooved grip safety are all

standard within the Raptor family. Stainless Raptors offer a choice of calibers (.45 ACP, 9mm, or 10mm), and all Ultra models feature a round-heel frame and flush-cut barrel. The quality of the Kimber 1911 rivals America's finest gunsmiths; hold a Raptor and see for yourself.

# STAINLESS II

## MODELS

### STAINLESS II

The accuracy, dependability, and renowned Kimber features of this family set the standard against which all other 1911 brands and models are measured. The pistol's legendary performance has made Kimber the world's largest producer of 1911 pistols. The Stainless™ II is built entirely from stainless steel, while the Pro and Ultra models have

stainless steel slides and lightweight aluminum frames. The Stainless Target (LS), an ideal competition pistol, brings the 6-inch barrel length and Series I configuration to this benchmark family. Combine these foundations with the slim nature of the 1911, and you have the cornerstone in carry, accuracy, and concealability.

# TLE II

## FULL-SIZE MODELS

### TLE II

The TLE™ (Tactical Law Enforcement) II family of pistols is well suited for duty carry, tactical applications, and personal protection. This group of 1911s features an integrated mainspring lanyard slot, aggressive G-10 grips, and a flat-top slide. Created for and in cooperation with law enforcement and military experts, TLE II models are professional tools

outfitted with performance-enhancing features that also meet the defensive-pistol needs of civilians. Available with barrels threaded for suppression, and a variety of rail and caliber options, the TLE II family offers a configuration that meets almost any requirement. When you carry a Kimber TLE II, you carry with absolute confidence.

# WARRIOR MODELS

## DESERT WARRIOR

Desert Warrior® models are highly refined technical pistols loaded with features that enhance real-world performance—they are the realization of the 1911 as a military and law enforcement tool. The Kimber Tactical Rail permits the quick and secure mounting of accessories. Tactical Wedge night sights ensure low-light performance, and new G-10 grips and

aggressive 24 LPI front strap checkering ensure a secure grip. Standard features include a military-length guide rod for quick field take down, tough KimPro® self-lubricating finish, ambidextrous thumb safety, and a lanyard slot for additional retention options.

## MODELS

### SPECIAL EDITIONS

Kimber continues its tradition of providing custom finishes and features that stand out in a crowd. Making a statement above and beyond the ordinary, Kimber Special Editions offer striking aesthetics and custom features. The gemstone collection features polished PVD-finished slides and small parts. Slides are accented by intricate cut-scroll engraving and topped with tritium night sights. Coordinating grips are

slim, reducing the width and accommodating smaller hands. The ultimate backcountry protection, RMEF® Camp Guard 10™, finds itself in good company with the Hero Custom—the result of a sponsorship with the Boot Campaign. With Kimber, performance and reliability are not compromised when unique finishing details are desired.

# CUSTOM SHOP

## MODELS

### CUSTOM SHOP

Each unique model found in the Kimber Custom Shop collection is superlative in every respect, from features to accuracy to dependability. The pistols are the finest representatives in the pistols' respective classes. The Super Jägar™ carries the premier red dot optic from Leupold®, the DeltaPoint Pro. The hunter has a wider field of view with a generous window and a 2 MOA dot. To tame the recoil of the

10mm round, the Super Jägar's 6-inch barrel and long slide are ported. At home in any competition, the Super Match II carries an accuracy guarantee of 5 shots, 25 yards, 1-inch group, or less. The Super Match II is the apex example of a single-stack competition model, featuring an extended magwell to aid reloads and beautiful walnut grips. They are indeed the finest examples of their kind.

# LIGHTWEIGHT MODELS

## LIGHTWEIGHT (LW)

The Lightweights from Kimber represent the foundation of what makes Kimber great, strong fit and finish. However, unlike the rest of the Kimber line, the lightweights do not feature tritium sights, G-10 Grips, slide details, or other

features that set premium Kimbers apart from every other 1911. Our customers asked for a Kimber that kept the quality without the price, and the lightweight category features just that.

K6s

The Kimber K6s™ are among today's most accurate, shootable, and dependable compact revolvers. Delivering on size and power, the K6s and K6xs are among the slimmest-framed, smallest 6-shot cylinder revolvers on the market

today. Mild recoil and a smooth double-action trigger make these revolvers a pleasure to shoot. Kimber engineers pushed the envelope to create the finest premium-grade production revolver on the market, regardless of size.

# K6s DASA MODELS

## K6s DASA

The Kimber K6s DASA is the next evolution of the Kimber revolver product line that takes the acclaimed K6s system and outfits it with a double and single-action trigger mechanism. The platform maintains the benefits of the

original K6s, such as the outstanding double-action trigger pull, compact envelope, and six-shot capacity, but with the added advantage of a light, crisp single-action trigger.

# MICRO PISTOLS

**PICK UP AN INDEPENDENT STREAK.** Micro™ .380 ACP and 9mm pistols bring an unmatched level of safety, dependability, and performance to concealed carry. Small and light, they blend Kimber quality with superior 1911-like ergonomics and simple operation. Mild recoil and a smooth single-action trigger pull make them a pleasure to shoot.

# MICRO MODELS

## MICRO

The Micro™ .380 ACP group of pistols combines mild recoil and simple operation with no sacrifice on quality and performance. Mirroring the features and finishes of some of Kimber's most popular 1911 families and unique models for the platform, there truly is a Micro for everyone. Collectively, the Micro line creates the most refined, ultra-

compact .380 ACPs available today. Standard components and characteristics across the Micro line include a single-action trigger design, a lowered and flared ejection port, a beveled magazine well, and night sights. These features make the Micro line the smallest firearms in the Kimber stable, yet still carry the quality expected from all Kimbers.

### MICRO 9

The Micro 9™ group of pistols put legendary Kimber dependability into a small 1911-like platform. 9mm power and simple operation make these pistols an ideal choice for many shooters. A wide variety of models are available, providing features that meet virtually any need. The Micro 9 line was expanded to offer shooters what they've been asking

for most: a mini compensator (MC) to mitigate both muzzle rise and felt recoil. The Micro 9 has taken design inspiration from the 1911 RAPIDE series of pistols to round out the line extensions. Collectively, these pistols are among the finest ultra-compact 9mm hammer-fired pistols anyone can carry.

# RIFLES

**WE DON'T SIZE RIFLES. WE TAILOR THEM.** When Kimber introduced its line of hunting rifles in 1979, they were unknown. That didn't last long. They quickly began turning heads with their good looks and changing minds with their superior performance. Today, we're proud to offer discerning hunters and shooters a full lineup of hard-core hunting rifles. Each rifle is based on an action size designed with minimal dimensions for the cartridge's family, and each is guaranteed under the Kimber SUB-MOA Accuracy Standard.

# HUNTER MODELS

## HUNTER RIFLES

The Kimber Hunter offers our legendary accuracy and performance paired with a synthetic stock and detachable box magazine. Three models are available: the Hunter Pro Desolve® Blak with a satin-silver barrel and receiver with muzzle brake, and a Desolve® Blak stock; the Hunter Pro (Boot Campaign) in Kryptek Obskura NOX with muzzle brake;

and the original Hunter with a satin silver-finished barrel and action. Our Boot Campaign rifle carries the Boot Campaign logo engraved on the barrel, and a portion of the proceeds go directly to this charity that works to help veterans across the United States. Chambered in a wide selection of cartridges, this rifle family offers the ideal combinations for any game.

**\*ALL KIMBER SPORTER RIFLES COME WITH A SUB-MOA ACCURACY GUARANTEE.**

### HUNTER PRO BOOT CAMPAIGN

ITEM #	UPC #	CALIBER	BARREL	WEIGHT	ACTION
3000894	669278308944	6.5 CREEDMOOR	22 INCHES	5 POUNDS 10 OUNCES	84M ACTION

MSRP STARTING AT:  
**\$1,117.00**

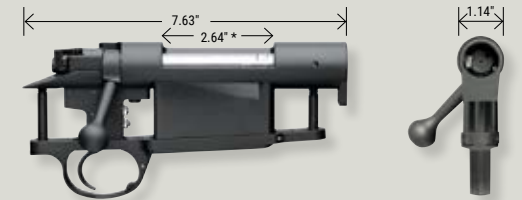

The Hunter Pro Boot Campaign rifle is a special edition for a critical mission. Each goes above and beyond the attention to detail Kimber is famous for, with military-inspired colors and extras such as custom engraving and a Kryptek® Obskura stock. Kimber is a proud business supporter of the Boot Campaign. The Boot Campaign provides programs and initiatives to help veterans and families transition from military life to civilian life.

#### ACTION FAMILY

### 84M (MEDIUM) ACTION

The 84M action has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win. As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation.

### HUNTER PRO DESOLVE BLAK

ITEM #	UPC #	CALIBER	BARREL	WEIGHT	ACTION

Kimber's Hunter Pro rifles feature the Classic Kimber design and Model 84 performance in full stainless with a muzzle brake, 3-round detachable box magazine and an extremely durable synthetic stock in the Desolve® Blak pattern. Each Hunter Pro rifle is guaranteed under the Kimber **SUB-MOA Accuracy Standard**.

### ACTION FAMILY

#### 84L (LONG) ACTION

The 84L (Long) action has the minimal diameter of the 84M but is slightly longer to fit America's most popular and powerful hunting cartridges, such as the .270 Win. and .30-06 Sprg, making it the lightest rifle in its class.

**DETACHABLE 3-RND MAGAZINE**

MAUSER CLAW EXTRACTOR**

**7/16 X 28 THREADED BARREL  
WITH MUZZLE BREAK**

**22"-24" BARREL LENGTHS  
KIMPRO® II GRAY FINISH**

# MOUNTAIN MODELS

## MOUNTAIN RIFLES

Hard-core hunters understand that a true mountain rifle must be light and accurate. Montana™ and Mountain Ascent™ models are the lightest production big-game rifles ever offered, delivering legendary Kimber accuracy yet still weighing as little as 4 pounds, 13 ounces. Hand-laid, composite stocks add strength, and stainless steel shrugs the elements. All Kimber

Mountain rifles offer a threaded barrel for the optional use of muzzle brakes and suppressors. Montana rifles combine all the best features in a lightweight, stainless steel, and reinforced composite package that helps ensure performance. Mountain Ascent models go even further, featuring a spiral-fluted bolt body and hollow bolt knob.

**\*ALL KIMBER SPORTER RIFLES COME WITH A SUB-MOA ACCURACY GUARANTEE.**

### MOUNTAIN ASCENT™ CAZA

The Mountain Ascent Caza is set apart from every other rifle on the market due to its extremely lightweight design. It is built with a reinforced composite stock, while fluting can be found on the barrel, bolt, and bolt handle, while featuring a 4-round internal magazine. This rifle gives the discerning hunter the peak performance they expect from Kimber. Each Mountain Ascent rifle is guaranteed under the Kimber **SUB-MOA Accuracy Standard**.

#### ACTION FAMILY

##### 84M (MEDIUM) ACTION

The 84M action has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win. As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation.

### MOUNTAIN ASCENT™ SKYFALL

## MODELS

### PEPPERBLASTER II

It's a crazy world we live in; it seems like every day brings a new surprise. Some surprises are good, but others... these are the times you'll be glad you or your loved one is carrying PepperBlaster II™. PBII will put its operator in control with

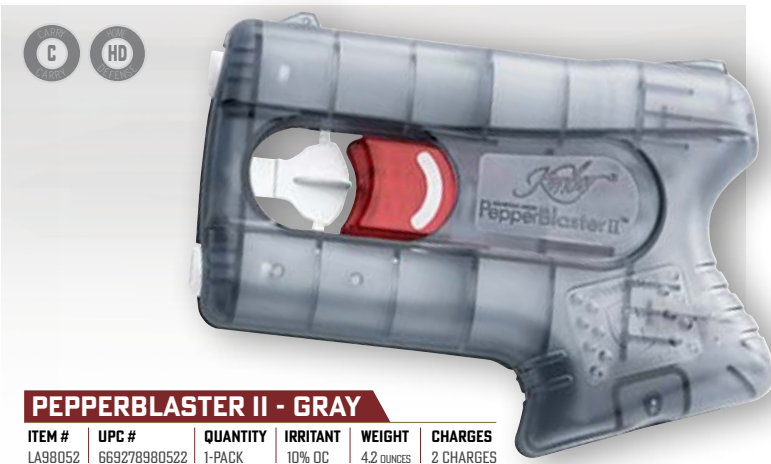

the most powerful, most advanced pepper-defense system on the planet. Designed to be **3x more effective** than most popular pepper spray because it's not a spray.
