2022 CATALOG

WHAT ALL GUNS SHOULD BE™

If you're going to make factory guns with the kind of look, feel, details and upgrades you typically find in custom offerings, you've got to have the right kind of factory. That's why we gave our new Troy, Alabama facility the same level of attention we give our firearms, so you'll know that every Kimber coming off the line — your Kimber — is the best it can possibly be.

© 2021 KIMBER MFG., INC. WWW.KIMBERAMERICA.COM

WHAT ALL GUNS SHOULD BE™

WE GET IT.

WE'RE NOT FOLLOWERS EITHER.

Maybe that's why a Kimber speaks to you. Because behind every Kimber, there's a story. About craftsmanship. An obsession with getting things exactly right. And being true to ourselves. With a Kimber, you know exactly what you're getting, inside and out. So forge your own path. Make your mark. And whatever Kimber you choose, Own it.

KIMBER. WHAT ALL GUNS SHOULD BE.

**PROUDLY MADE
IN THE U.S.A.**

▷ **NEW PRODUCTS**

JUST LIKE YOU, at Kimber, we go our own way. When we introduce a new gun, it's because we want to push its limits, and bring Kimber's signature quality, innovation, reliability, and swagger to bear on it. Take our latest offerings for concealed carry and personal defense, target shooting, hunting, and other pursuits. Being better than the rest wasn't good enough. That's why the Kimber you carry is What All Guns Should Be™. Learn more about these and all things Kimber at kimberamerica.com.

MICRO & MICRO 9

MICRO™ and **MICRO 9™** pistols include many proven 1911 design elements that make them comfortable to carry, safe to operate, and easy to shoot accurately. With a starting weight of 13.4 ounces in the Micro, 15.6 ounces in the Micro 9, and barrel length of 2.75 inches in the Micro and 3.15 inches in the Micro 9, they are well-suited for concealed carry. With a mild .380 ACP recoil in the Micro and a manageable 9mm recoil in the Micro 9, both are ideal sub-compact carry guns.

- ▶ **Short barrels and thin profiles ensure concealability**
- ▶ **Lightweight and easy to carry**
- ▶ **Smaller grip dimensions provide a good fit for all hand sizes**

ULTRA

ULTRA™ models are easy to conceal and comfortable to carry due to the guns' 3-inch bull barrels and short grips. Most frames are made from aluminum to reduce weight. While light pistols do have a slight increase in recoil, this is minimized by Kimber's recoil system and unequalled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality helps ensure this does not compromise dependability or accuracy.

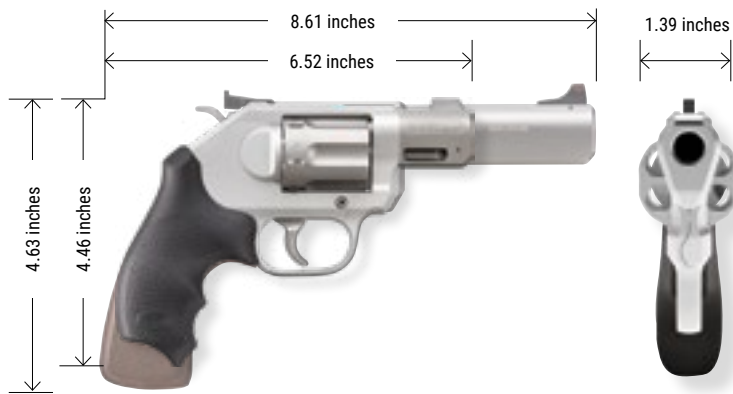

- ▶ **3-Inch barrel length for easy concealment**
- ▶ **Short grip for concealability and comfortable carry**
- ▶ **Most Ultra models weigh 25 ounces**
- ▶ **Available in 2 calibers**

K6s

K6s™ models have a 6-round capacity, compact frame and cylinder, and a 2- to 4-inch barrel. Edges are rounded and blended so it is less likely to snag on clothing. For those that require power in a slim package, the revolver models fit the bill as they all have a 6-round cylinder housed in a small or extra small frame. This makes them well suited for backup or concealed carry.

- ▶ **Compact, 6-round capacity cylinder**
- ▶ **Ergonomic grip design for easily controlled recoil**
- ▶ **Available .38 SPL/.357 Mag. or .38 SPL +P**

PRO

PRO™ models may be the best all-around 1911 configuration, combining a 4-inch barrel with a full-length grip. An ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames, while others have heavier steel frames. Two models include the Kimber Tactical Rail™ for mounting lights and accessories. All Pro models have a near-perfect balance that makes shooting the pistols easy, accurate and fun.

- ▶ **4-Inch barrel length to optimize balance and concealability**
- ▶ **Full-length grip fits shooters with larger hands**
- ▶ **Frame options permit a model selection that meets multiple needs**
- ▶ **Available in 2 calibers**

EVO SP

EVO SP™ models have a 3.16-inch barrel in a striker-fired, all-metal platform. Chambered in 9mm and shipping with a 7-round magazine, the EVO SP pistols are an excellent combination of the time-tested construction of an all-metal gun in an ultra-reliable, striker-fired pistol. At 19 ounces, the EVO SP has a user-configurable magazine release, a grip system that is scalable and requires no hardware, and breaks down without a trigger press.

- ▶ **Ships with 7-round magazine**
- ▶ **All-metal construction weighing only 19 ounces**
- ▶ **Available in 9mm**

CUSTOM

CUSTOM™ models are full-size 1911 pistols featuring a 5-inch barrel and full-length grip. The most popular configuration, Custom models are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, the pistols are easier to shoot accurately and have reduced recoil. The slim profile and outstanding 1911 ergonomics make them well suited for duty, personal defense and general use.

- ▶ **Full-length grip fits shooters with larger hands**
- ▶ **5-Inch barrel length for improved velocity and accuracy**
- ▶ **Wide selection of models for any application**
- ▶ **Available in 4 calibers**

R7 MAKO

R7 MAKO™ models have a 3.37 inch barrel built into a modular polymer striker-fired system. Shipping with both an 11-round and 13-round magazine, the R7 Mako pistols are an excellent combination of the time-tested steel and polymer construction in an ultra-reliable, striker-fired platform. At just 19.5 ounces, the R7 Mako has fully ambidextrous controls and full wrap-around stippled texturing.

- ▶ **Ships with 11- and 13-round magazines**
- ▶ **Weighing only 19.5 ounces without the magazine**
- ▶ **Available in 9mm**

LS

LS models are full-size 1911 pistols featuring a 6-inch barrel and full-length grip. An ideal configuration for competition or as a hunting sidearm, the Long Slide 1911s are a popular platform at the range and in the field because of the pistols' inherent accuracy and recoil-reducing weight.

- ▶ **6-Inch barrel length for optimal velocity and accuracy**
- ▶ **Various models feature custom-level features such as porting, optics, adjustable sights, and a round-heel frame**
- ▶ **Available in 2 calibers**

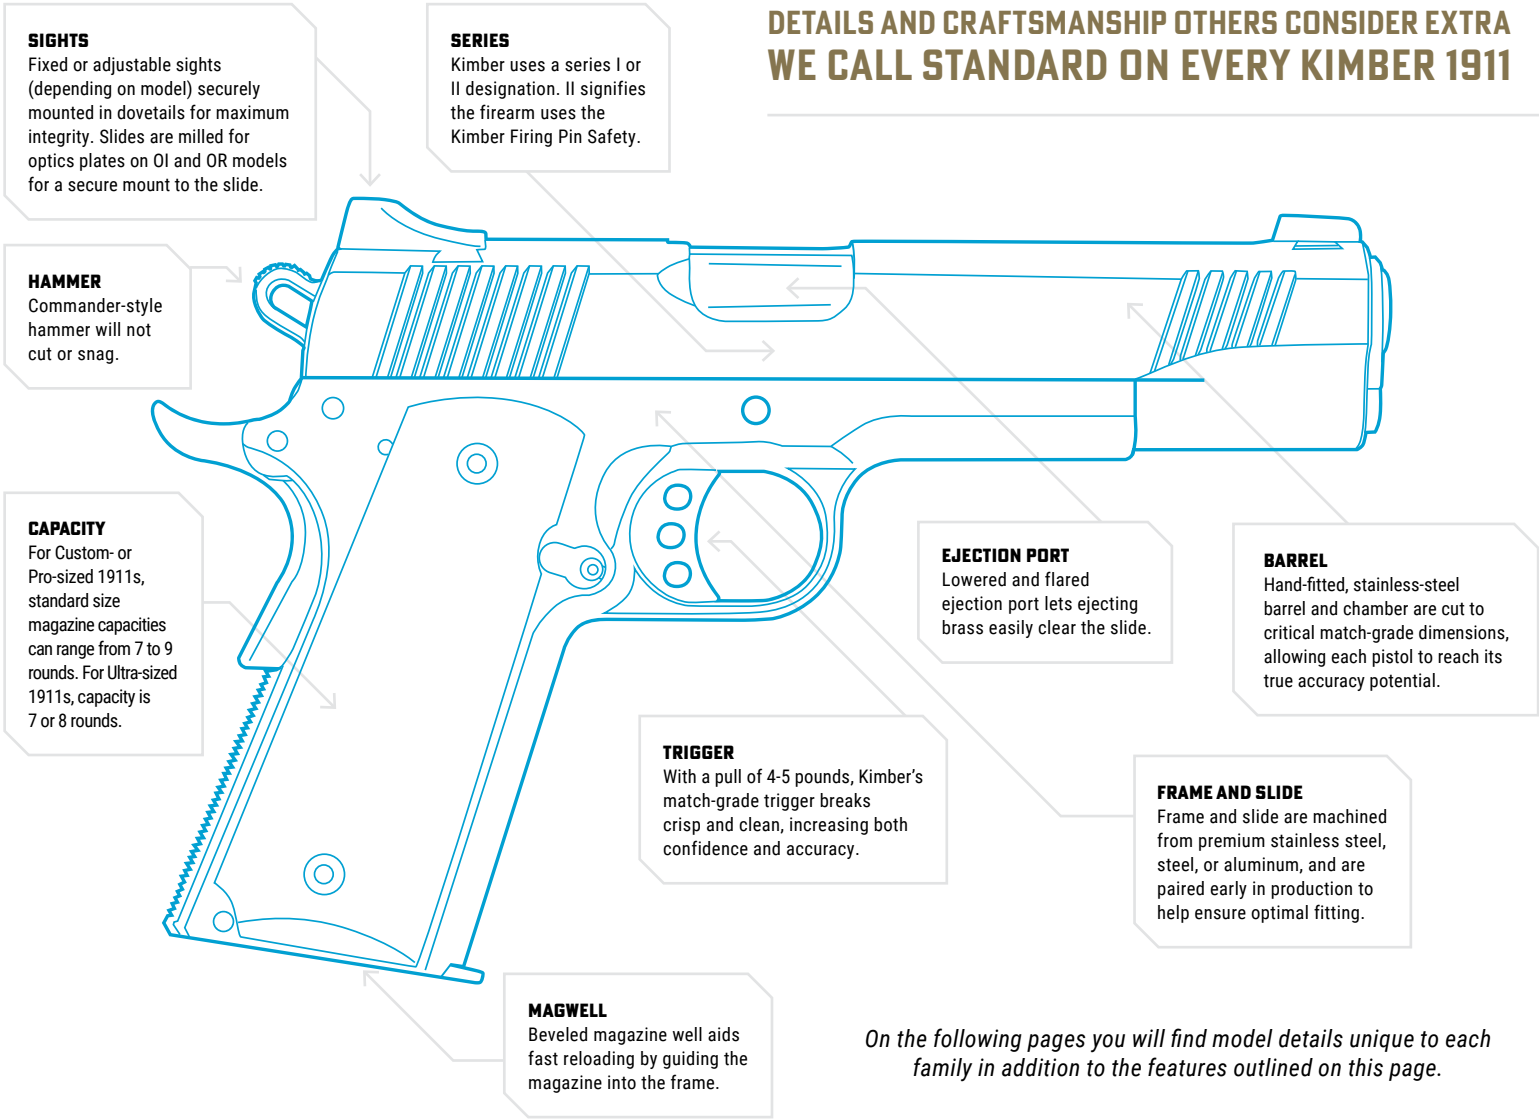

MADE

MADE FROM SOLID
STEEL
HEART
AND
SOUL

WAGSB-01

ALL 1911s AREN'T CREATED EQUAL. There's just something about the 1911 platform. It's big. Bold. Rock solid. At Kimber we take what's already great about the 1911, and make it even better. We transform it into a firearm that stands apart from the rest. So while we may be the largest producer of 1911s in the world, you'll still be able to find a Kimber 1911 that speaks to you. Compare yours with any other—or any other type of semi automatic—and you'll see why Kimber is on an entirely different level.

KIMBER® BUILDS the world's best factory 1911 pistols to the highest tolerances possible, right here in America. Those facts alone set us apart from so many others, but the differences run deeper. We only choose the highest-quality raw materials; that's our foundation for success. We manufacture every critical component in our Kimber factories; getting it right means doing it yourself. Finally, all parts are fitted together by hand; there's

simply no other way to make a Kimber. It's why America's best shooters, including legendary SWAT units and United States Marines assigned to the U.S. Special Operations Command, have chosen Kimber: We'll never settle for what anyone else could make. Discover our different 1911 models on the following pages, or visit kimberamerica.com.

The features detailed below are offered in addition to the standard features found on every Kimber 1911 listed on page 9.

THIS MODEL
FEATURES

SIGHTS
Vortex® Venom® Red Dot installed with 6 MOA dot and white-dot co-witness sights.

SLIDE
AEX serrations provide innovative grip surface at the rear and forend of the slide. Edges receive a Carry Melt treatment.

FINISH
KimPro® II charcoal gray on the slide, and silver on the frame.

GRIPS
Striking G-10 green, black and gray grips.

FRAME
Serrated, rounded-heel frame wears 24 lines-per-inch (LPI) front strap checkering.

A complete presentation of specifications and features begins on page 75.

AEGIS ELITE has round-heel frames, finished in KimPro® II silver and two-tone styling, and is completed with G-10 Cyclone-patterned grips, making these pistols particularly useful in target-shooting scenarios. AEX-pattern serrations are a stylish answer to the practical need for grip surface during reloads. The Aegis Elite feature fiber-optic sights on the Ultra, Pro, and

Custom models, while the Optics Installed (OI) Pro and Custom models have the Vortex® Venom® Red Dot with a 6 MOA dot, milled and installed before leaving Kimber. Remaining true to Kimber's original purpose, this puts an otherwise custom gun within the reach of every shooter's hands.

A complete presentation of specifications and features begins on page 75.

THE CDP™ (CUSTOM DEFENSE PACKAGE) pistols combine all the best carry features into a package that gives the pistol its name and reduces the price by over \$600, making them an incredible value. Featuring tritium night sights mounted on a stainless-steel, flat-top slide, and a flush-cut barrel. The lightweight, aluminum frame has 30 LPI checkering on the front strap and

under the trigger guard. The frame, slide and small parts wear our KimPro® II finishes. The Carry Melt™ treatment rounds and blends edges to prevent snagging on clothing. The Ultra-sized pistol features a round-heel frame and flush-cut barrel. CDP pistols have no equal for carry and defense—just what you expect from Kimber.

A complete presentation of specifications and features begins on page 75.

THE COVERT™ .45 ACP pistols have the perfect combination of lightweight, meaningful features. Covert pistols feature a gray color palette, flush-cut barrel and a round-heel frame on the Ultra models, as well as both the Crimson Trace Laser grips® and Tactical Wedge tritium night sights—two sight systems that create a sight picture regardless of light conditions. The 30 LPI front strap checkering ensures a positive grip even with cold, wet, or

gloved hands. The Carry Melt™ treatment contours, rounds and blends edges so it won't snag. A bumped and grooved beavertail grip safety provides control under stress, while the mainspring housing with lanyard slot on the Custom and Pro models add an extra level of safeguard if needed. Kimber's Covert quality ensures unequalled accuracy and dependability—there is no reason to be afraid of the dark.

RAPTOR™ II pistols take their name from a combination of aggressive slide and frame serrations, feathered logo grips and special-scaled texturing accents. While this patented design is unique, the features, dependability and accuracy are pure Kimber. Tritium night sights, ambidextrous thumb safety, and a bumped-and-grooved grip safety are all standard within the

Raptor family. Stainless Raptors offer a choice of calibers (.45 ACP, 9mm, or 10mm), and all Ultra models feature a round-heel frame and flush-cut barrel. The quality of the Kimber 1911 rivals America's finest gunsmiths. Hold a Raptor and see for yourself.

THE ACCURACY, dependability and renowned Kimber features of this family set the standard against which all other 1911 brands and models are measured. The pistol’s legendary performance has made Kimber the world’s largest producer of 1911 pistols. The Stainless™ II is built entirely from stainless steel, while the Pro and Ultra models have stainless steel

slides and lightweight, aluminum frames. The Stainless Target (LS), an ideal competition pistol, brings the 6-inch barrel length and Series I configuration to this benchmark family. Combine these foundations with the slim nature of the 1911, and you have the cornerstone in carry, accuracy, and concealability.

THE TLE™ (Tactical Law Enforcement) II family of pistols is well suited for duty carry, tactical applications, and personal protection. This group of 1911s features an integrated mainspring lanyard slot, aggressive G-10 grips and a flat-top slide. Created for and in cooperation with law enforcement and military experts, TLE II models are professional tools outfitted with

performance-enhancing features that also meet the defensive-pistol needs of civilians. Available with barrels threaded for suppression, and a variety of rail and caliber options, the TLE II family offers a configuration that meets almost any requirement. When you carry a Kimber TLE II, you carry with absolute confidence.

▷ TWO - TONE II

KIMBER CONTINUES in its tradition of providing custom finishes and features that stand out in a crowd. Making a statement above and beyond the ordinary, Kimber Special Editions offer striking aesthetics and custom features. The gemstone collection features polished PVD-finished slides and small parts. Slides are accented by intricate cut-scroll engraving and

topped with tritium night sights. Coordinating grips are slim, allowing for increased hand contact. Coordinating grips are slim, allowing for increased hand contact. The ultimate backcountry protection, RMEF® Camp Guard 10™, finds itself in good company with the Hero Custom—the result of a sponsorship with the Boot Campaign. With Kimber, performance and reliability are not compromised when unique finishing details are desired.

ACCURACY GUARANTEE

- ▶ Stainless steel slide is finished with KimPro® II black and aggressive slide serrations
- ▶ 30 LPI checkering on front strap and under trigger guard
- ▶ Fancy walnut checkered grips
- ▶ Ambidextrous thumb safeties
- ▶ Serrated, adjustable sights

EACH UNIQUE model found in the Kimber Custom Shop collection is superlative in every respect, from features to accuracy to dependability. The pistols are the finest representatives in the pistols' respective classes. The Super Jägare™, carries the premier red dot optic from Leupold®, the DeltaPoint Pro. With a generous window and 2 MOA dot, the hunter has a wider field of view. To tame the recoil of the 10mm round, the Super Jägare's

6-inch barrel and LS slide are ported, and finished in DLC for a durable, hunt-ready 1911. At home in any competition, the Super Match II carries an accuracy guarantee of 5 shots, 25 yards, 1-inch group or less. The Super Match II is the apex example of a single stack competition model, wearing KimPro® II throughout, an extended magwell to aid reloads, and beautiful walnut grips. They are truly the finest examples of their kind.

R7/MAKO

▷ **R7 MAKO PISTOLS**

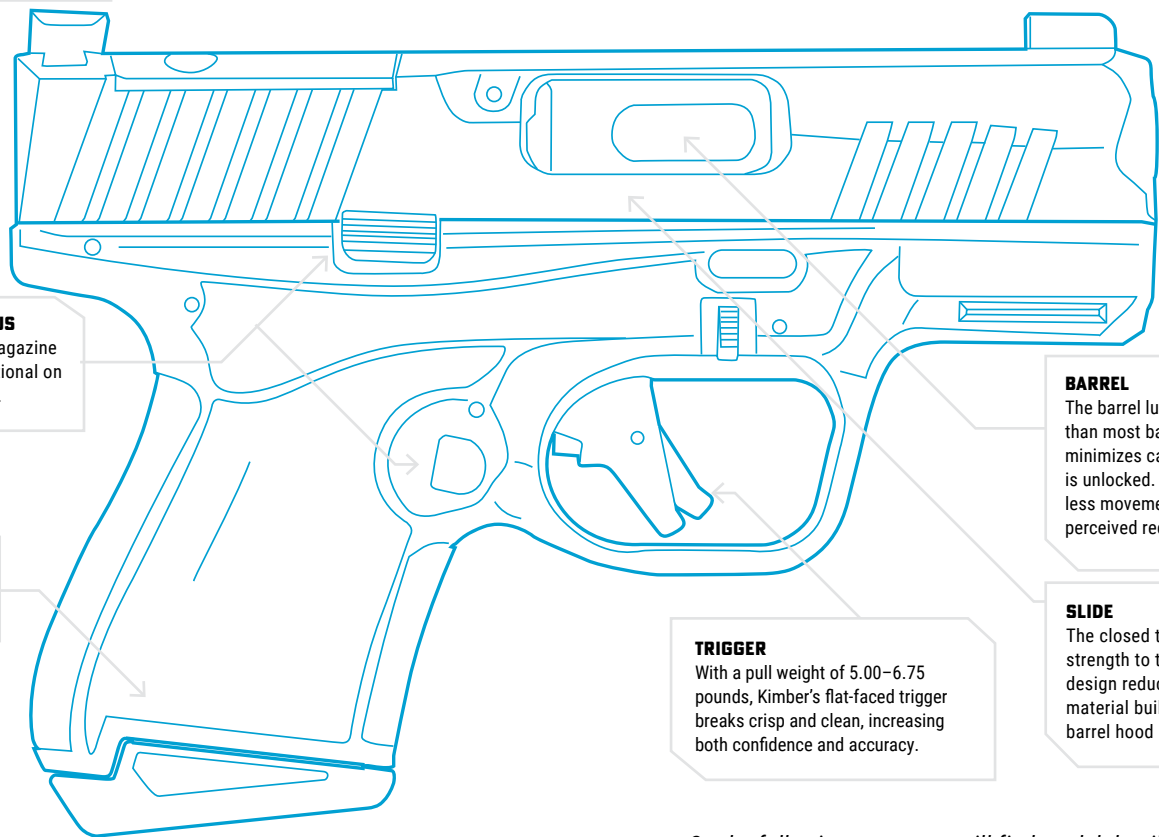

BREAKING NEW GROUND. SHATTERING OLD PERCEPTIONS. A high-capacity, polymer-frame, striker-fired subcompact...from Kimber. It makes sense that the best concealed carry pistol in years would come from a name most people didn't see coming. After all, we make every firearm we touch better, by making it on our terms. Not only have we given the R7 Mako™ the most advanced technology and upgrades, we've given it the attention to fit, finish, and detail you've come to expect from every Kimber.

SIGHTS
All R7 Makos are optics ready. The Optics Installed model comes with the Crimson Trace CT-1500 optic already installed. The optic cut also accepts the Shield RMSc Red Dot Sight.

FULLY AMBIDEXTROUS
The slide lever and magazine release are fully functional on either side of the gun.

CAPACITY
R7 Makos come with an 11- and 13-round magazine.

DETAILS AND CRAFTSMANSHIP OTHERS CONSIDER EXTRA WE CALL STANDARD ON EVERY R7 MAKO

BARREL
The barrel lug sits farther back than most barrel designs and minimizes cant when the slide is unlocked. Less cant means less movement, and minimizes perceived recoil.

SLIDE
The closed top gives added strength to the slide. This design reduces potential material buildup between the barrel hood and slide.

TRIGGER
With a pull weight of 5.00–6.75 pounds, Kimber's flat-faced trigger breaks crisp and clean, increasing both confidence and accuracy.

On the following pages you will find model details unique to each family, in addition to the features outlined on this page.

KIMBER IS UPGRADING the standards of the polymer-pistol market with the R7 Mako™, a pistol in a league all its own due to its unmatched features. The polymer frame features molded stippling for a sure grip in all conditions and makes the pistol lightweight (19.5 ounces empty). Measuring a mere 1 inch wide, the R7 Mako still manages to pack 11 rounds in the standard

magazine, and 13 rounds in the included extended magazine (10-round magazines are available). The low-tilt, 3.37-inch, stainless-steel barrel mitigates recoil. The R7 Mako makes its debut with two models: Optics Ready and Optics Installed. In a market flooded with polymer-framed guns, feed your appetite for something different.

The features detailed below are offered in addition to the standard features found on every Kimber R7 Mako listed on page 25.

THIS MODEL
FEATURES

SIGHTS
Crimson Trace® CT-1500 Red Dot optic with 3 MOA. TruGlo® Tritium™ Pro night sights with an orange high-contrast front ring co-witness.

SLIDE
Milled for the Crimson Trace® optic, with rear and forend serrations. Shrouded ejection port keeps slide stiffer, and more durable, while allowing less foreign material to accumulate during carry.

FINISH
Tough FNC (Ferritic Nitrocarburizing) finish is durable and resists the elements.

FRAME
Fully ambidextrous controls are housed in a polymer frame, dressed with a carry-ready texture. Generous trigger guard allows for use with gloved hands.

R7 Mako™ (OI)	3800005	669278380056	9mm	3.37

A complete presentation of specifications and features begins on page 76.

THE R7 MAKO™, Kimber's new polymer-framed pistol, doesn't just copy what's been done by other manufacturers. From the outset, Kimber went to work to produce a better gun than anything currently available, and to say Kimber succeeded is an understatement. The feature-heavy R7 Mako gives you everything you need in a defensive pistol, and then some. Whether

it's the iron-sighted Optics Ready or Optics Installed model, both carry the completely ambidextrous controls and the long list of features. The R7 Mako is at home with either its 11-round magazine (shown above) or its 13-round extended magazine, all while maintaining a slim profile. With the R7 Mako you never have to leave a feature on the table.

The features detailed below are offered in addition to the standard features found on every Kimber R7 Mako listed on page 25.

AVAILABLE MAGAZINES:

FORGED WITH SOMETHING MORE THAN METAL. Confidence. You feel it when you first pick up the EVO SP™. Attention to detail. You'll see it in every aspect of Kimber's all-metal, striker-fired subcompact. It was designed to deliver the performance you demand, with a level of style and ruggedness you won't find anywhere else. With all of this, plus more finishes, custom grips, and a wealth of upgrades, there's just one thing left to do: carry it.

On the following pages you will find model details unique to each family, in addition to the features outlined on this page.

AT THE HEART of the handgun is a striker-fire mechanism that delivers a smooth, crisp and consistent trigger pull from start to finish. Linking the shooter to the system is a metal trigger and trigger safety that not only ensure accuracy, but inspire confidence as well. An aluminum-alloy frame provides overall integrity and a rigid platform in which the deep-crowned,

stainless steel barrel rests. Standard features for all models include a lowered and flared ejection port for enhanced ejection, a beveled magazine well for efficient, positive loading, and night sights for fast target acquisition in any lighting level.

EVO SP PISTOLS

A complete presentation of specifications and features begins on page 77.

EVO SP™ (Striker Pistol) was tailored by Kimber engineers to be the best shooting and most well-equipped, compact, metal-framed pistol on the market. Not only was EVO SP machined to the tightest allowable tolerances, but it was also put through thorough testing to ensure the best possible user experience. Standout features include an innovative grip system that eliminates hardware on the grip surface, a magazine release configurable for right- or left-handed

shooters, a striker indicator allowing for both a visual and physical confirmation, ledged night sights for single-hand manipulations and a sight picture in all the light conditions, a 6-7 lb trigger with crisp reset, and shipped with two 7-round magazines (EVO SP Select models are shipped with one 7-round magazine). EVO SP is the ideal choice for shooters that demand a feature-packed, compact striker-fired firearm, matched with all-metal construction.

▷ MICRO PISTOLS

PICK UP AN INDEPENDENT STREAK. Micro™ .380 ACP and 9mm pistols bring an unmatched level of safety, dependability and performance to concealed carry. Small and light, they blend Kimber quality with superior 1911-like ergonomics and simple operation. Mild recoil and a smooth single-action trigger pull make them a pleasure to shoot.

On the following pages you will find model details unique to each family, in addition to the features outlined on this page.

WITH A STARTING WEIGHT of 13.4 ounces and a barrel length of 2.75-inches, Kimber Micro™ .380 ACP and 9mm pistols are easy to carry and conceal. Micro barrels are machined from stainless steel for superior resistance to moisture, and all Micro frames are shaped from the finest aluminum for integrity and strength. In many respects a miniature 1911, the

Micro offers a crisp single-action trigger and thumb safety. Sights are steel, and mounted in machined dovetails for additional integrity. Well suited for all shooters, including those with small hands, Micro pistols provide power in our smallest platform. Best of all, they offer unequaled Kimber quality, dependability and performance.

MICRO PISTOLS

The features detailed below are offered in addition to the standard features found on every Kimber Micro listed on page 33.

THIS MODEL
FEATURES

SIGHTS
Low-profile Tritium night sights.

SLIDE
Brushed slide flats contrast sharply with the rear serrations in a reference to the 1911 of the same name.

FINISH
KimPro™ II charcoal gray with brushed slide flats and black small parts.

GRIPS
Black/gray G-10 grips provide a positive surface texture for grip confidence.

FRAME
Lightweight-aluminum frame has 24 LPI front strap checkering.

THE MICRO™ .380 ACP group of pistols combines mild recoil and simple operation with no sacrifice on quality and performance. Mirroring the features and finishes of some of Kimber's most popular 1911 families, as well as unique models for the platform, there truly is a Micro for everyone. Collectively, the Micro line creates the most refined, ultra-compact .380 ACPs

available today. Standard components and characteristics found across the Micro line include a single-action trigger design, a lowered and flared ejection port, beveled magazine well and night sights. These features make the Micro line the smallest firearms in the Kimber stable, yet still carry the quality expected from all Kimbers.

A complete presentation of specifications and features begins on page 77.

THE MICRO 9™ group of pistols put legendary Kimber dependability into a small 1911-like platform. 9mm power and simple operation make these pistols an ideal choice for many shooters. A wide variety of models are available, providing a selection of features that meet virtually any need. For 2021, the Micro 9 line was expanded to offer shooters what they've been

asking for most: a mini compensator (MC) to mitigate both muzzle rise and felt recoil, and optics-installed models (OI). To round out the line extensions, the Micro 9 has taken design inspirations from the 1911 RAPIDE series of pistols. Collectively, these pistols are among the finest ultra-compact 9mm hammer-fired pistols anyone can carry.

MICRO 9

▷ **K6s REVOLVERS**

NOW THIS IS HOW YOU ROLL. Until Kimber, concealed carry revolvers left something to be desired. Now, our K6s™ series is what’s desired. The reasons are clear. Each K6s takes the proven ruggedness and reliability of the revolver platform and evolves it. You get improved shootability. Greater control. Light, no-stack triggers. Superior ergonomics. It’s all there. With Kimber, the wheel gun is better than ever.

On the following pages you will find model details unique to each revolver, in addition to the features outlined on this page.

THE KIMBER K6s™ are among the most accurate, shootable and dependable compact revolvers available today. Delivering on size and power, the K6s and K6xs are among the slimmest-framed, smallest 6-shot cylinder revolvers on the market today. Mild recoil and a smooth double-action trigger pull make

these revolvers a pleasure to shoot. Kimber engineers pushed the envelope to create the finest premium-grade production revolver on the market, no matter the size.

The features detailed below are offered in addition to the standard features found on every Kimber revolver listed on page 45.

THIS MODEL
FEATURES

SIGHTS
Fixed rear sight and front sight with a bright, high-contrast orange dot.

CYLINDER
6-shot fluted cylinder chambered in .38 Special +P.

FINISH
Silver KimPro® II finish on the frame, with a glass bead finish on the stainless-steel barrel.

GRIPS
Hogue® rubber Cobblestone grips have finger grooves and pinky extension for a comfortable, confident grip surface.

FRAME
Slightly smaller, the "xs" is for extra small, and is made of lightweight aluminum.

THE BIG NEWS for Kimber's K6s™ line is the addition of the K6xs Carry. Not only is it the lightest K6s ever, it offers something others in its category don't: six-round capacity. Built specifically for concealed carry and chambered in .38 SPL +P, the aluminum-alloy frame and fluted cylinder keep the revolver's total weight under a pound (15.9 ounces). The K6xs wears a silver KimPro II finish on the frame and a glass-bead finish on the 2-inch, stainless-steel barrel. The

Hogue rubber Cobblestone grips with finger grooves make it comfortable to shoot. Other additions to the K6s series include the brand-new Nightfall models. Both models are decked out in a matte-black finish and black Hogue G-10 grips with finger grooves. The K6s DC (Red) features Black DLC over a brushed-stainless finish and Red Lava G-10 Hogue grips.

WE DON'T SIZE RIFLES. WE TAILOR THEM. When Kimber first introduced its line of hunting rifles back in 1979, they were an unknown. That didn't last long. They quickly began turning heads with their good looks, and changing minds with their superior performance. Today, we're proud to offer discerning hunters and shooters a full lineup of classic sporters, hard-core hunting guns, varmint rigs, and no-compromise tactical rifles. Each is based on an action size designed with minimal dimensions for the cartridge's family, and each is guaranteed under the Kimber SUB-MOA Accuracy Standard.

DETAILS AND CRAFTSMANSHIP OTHERS CONSIDER EXTRA WE CALL STANDARD ON EVERY KIMBER RIFLE

SAFETY
Positive 3-position wing safety allows shooter to stay mounted on the rifle.

CONTROLLED-ROUND FEED
Full-length Mauser claw extractor delivers superior controlled-round feeding and extraction.

BARREL AND CHAMBER
Barrel and chamber machined to critical match-grade dimensions with rigid quality control ensures exceptional accuracy.

TRIGGER
Crisp, factory-set match-grade trigger.

BEDDING
Pillar and/or glass bedding provides strength and accuracy.

ACTION
Each proportioned action gives near-perfect balance for fast, positive aiming. Four actions are designed around caliber families so you never have to carry more weight than you need.

STOCK
Straight-comb stock design projects recoil into the shoulder, not up and over or into the cheekbone.

CARTRIDGE EXAMPLE SIZE COMPARISON

84M
.308 WIN.

84L
.30-06 SPRG.

8400 SM
.300 WSM

8400 LM
.300 WIN. MAG.

On the following pages you will find model details unique to each family, in addition to the features outlined on this page.

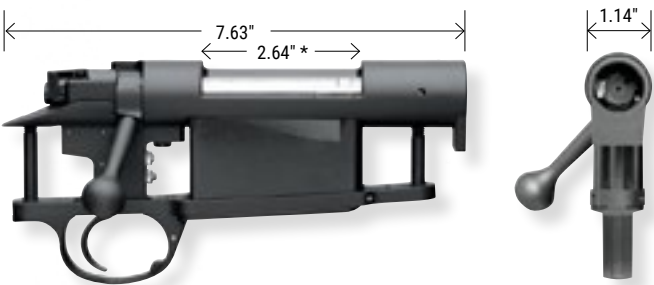

KIMBER RIFLES offer a combination of features that set them apart from other production brands. Barrels, chambers, and triggers are crafted to critical match-grade dimensions for unmatched accuracy. All of Kimber's rifles are controlled-round feed. Pillar and/or glass bedding add strength and ensure that nothing shifts under recoil or during rough use. Walnut stocks are finished and checkered by hand, and reinforced composite

stocks are the finest worn by any production rifle. Descriptions of each rifle family are presented throughout the following pages, and more than 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that will meet your needs. To locate your nearest Kimber Master Dealer, find complete information on each model, or view product videos, visit kimberamerica.com.

84M

The **84M (Medium) action** has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win. As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation.

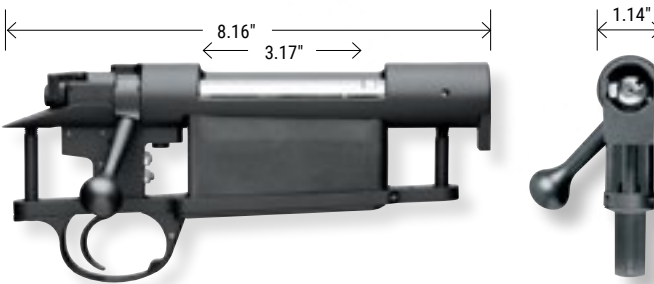

- ▶ Magazine capacity is 3-6 rounds, depending on cartridge chambering
- ▶ Available in 9 models and 8 calibers

84L

The **84L (Long) action** has the minimal diameter of the 84M but is slightly longer to fit America's most popular and powerful hunting cartridges, such as the .270 Win. and .30-06 Sprg, making it the lightest rifle in its class.

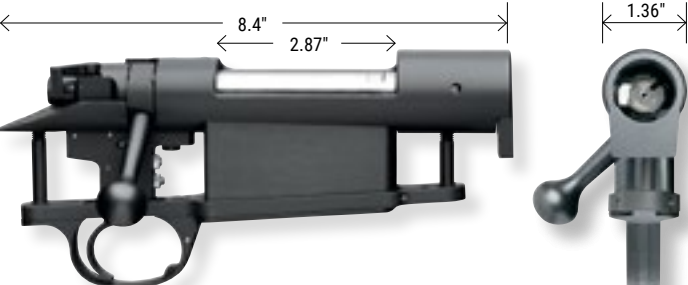

- ▶ Magazine capacity is 3-6 rounds, depending on cartridge chambering
- ▶ Available in 4 models and 3 calibers

8400 SM

The **8400 SM (Short Magnum) action**, sized for short magnum cartridges, has a greater diameter but remains as short as possible to reduce weight and ensure proper balance. Ideal for almost any North American big game.

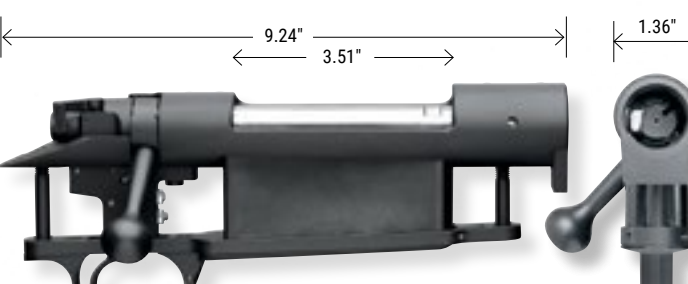

- ▶ Magazine capacity is 3-4 rounds, depending on cartridge chambering
- ▶ Available in 4 models and 4 calibers

8400 LM

The **8400 LM (Long Magnum) action** has the additional length necessary to fire some of the world's most powerful cartridges, such as .300 Win. Mag. and .375 H&H.

- ▶ Suitable for hunting both large and dangerous game
- ▶ Magazine capacity is 3-5 rounds, depending on cartridge chambering
- ▶ Available in 5 models and 3 calibers

ALL KIMBER SPORTER RIFLES COME WITH A SUB-MOA ACCURACY GUARANTEE.

ALL KIMBER TACTICAL RIFLES COME WITH A HALF-MOA ACCURACY GUARANTEE.

HUNTER

- ▷ Reinforced synthetic stock
- ▷ Detachable magazine for quick, easy loading and unloading
- ▷ Weather-resistant, stainless steel action with KimPro® II silver finish

THE KIMBER HUNTER offers our legendary accuracy and performance paired with a synthetic stock and detachable box magazine. Three models are available: the Hunter Pro Desolve® Blak with a satin-silver barrel and receiver with muzzle brake, and a Desolve® Blak stock; the Hunter Pro (Boot Campaign) in Kryptek Obskura NOX with muzzle brake; and the original Hunter with a satin silver-finished barrel and action. Our Boot Campaign rifle

carries the Boot Campaign logo engraved on the barrel, and a portion of the proceeds go directly to this charity that works to help veterans across the United States. Chambered in a wide selection of cartridges, this rifle family offers the ideal combinations for any type of game.

A TRUE MOUNTAIN RIFLE must be light and accurate—hard-core hunters understand that. Montana™, Adirondack™, and Mountain Ascent™ models are the lightest production big-game rifles ever offered, delivering legendary Kimber accuracy yet still weighing as little as 4 pounds, 13 ounces. Hand-laid, composite stocks add strength, and stainless steel shrugs the elements. All Kimber Mountain rifles offer a threaded barrel for optional use of muzzle

brakes and suppressors. Montana rifles combine all the best features in a lightweight, stainless steel and reinforced composite package that helps ensure performance. Adirondack and Mountain Ascent models go even further. Featuring a combination of spiral-fluted bolt body and hollow bolt knob, the Adirondack is compact for fast maneuvering.

The features detailed on these pages are offered in addition to the standard features found on every Kimber rifle listed on page 51.

THE MOUNTAIN ASCENT is set apart from every other rifle on the market due to its extremely lightweight design. The rifle gives the discerning hunter the peak performance they expect from top-notch Kimber products. From the fluted barrel and bolt body to the skeletonized bolt handle and extractor, as much material as is safely possible has been removed from the rifle. If your motto is “ounces equal pounds and pounds equal pain,” this ultralightweight

tips the scales at an ounce less than 6.5 pounds in the 8400 Magnum action, the “heaviest” action available. For those who want a rifle in the trimmest configuration possible, the Mountain Ascent can be had in the 84M Short action, weighing a mere 4 pounds, 13 ounces. Dressed with Gore™ Optifade™ soft-touch stock treatments and comes with Talley matte-black scope rings. Optifade rings and muzzle brake accessories are available separately.

KIMBER'S OPEN RANGE rifles are the culmination of premier technologies being offered in premium hunting rifles. The Open Range Pro Carbon rifle line provides the perfect balance of style and performance. AG Composites™, the industry leader in stock technology, provides a reliable platform that is ultra lightweight, supremely stiff, and impervious to the elements. At the pinnacle of modern barrel science, Proof Research's stainless steel,

carbon fiber-wrapped barrels offer superior stiffness, reduced harmonic vibration, life-extending heat dissipation and 12 ounces of weight reduction. Single-point cut rifling limits barrel stress and is preferred by many target shooters for its uniformity and close tolerances. Currently available in .308 Win. and 6.5 Creedmoor, the Open Range Pro Carbon rifles are true tack drivers for the most demanding hunter.

ACTION
Full-length Mauser claw extractor delivers superior controlled-round feeding and extraction, housed in a steel action. Action and sculpted bottom metal wear a hand-polished, blued finish.

BEDDING
Pillar and glass bedding to stabilize the receiver for consistency from shot to shot.

BARREL
22" carbon steel with a hand-polished, blued finish.

KIMBER'S TRADITIONAL rifles offer an unequalled combination of features, elegance and performance. All actions have minimal dimensions for the cartridges the rifles chamber, permitting a trim overall profile that reduces weight by as much as two pounds. All traditional rifles include critical design features that ensure performance and dependability. Stocks are borne of fine walnut, then checkered and finished by hand. The elegant pillar- and

glass-bedded sporter stock is carefully shaped. The properly dimensioned classic stock and recoil-absorbing 1-inch Pachmayr Decelerator® recoil pad diminish felt recoil. The straight-comb stock slides back into the shoulder, not up into the cheekbone, and a floorplate release inside the trigger bows, preventing accidental opening. Just as hunting is more than a sport, a Kimber traditional rifle is more than just a rifle.

The features detailed on these pages are offered in addition to the standard features found on every Kimber rifle listed on page 51.

A complete presentation of specifications and features begins on page 78.

KIMBER'S DANGEROUS GAME rifles deliver unwavering reliability and charge-stopping energy. The rifles have critical features absent from other production rifles in heavy calibers. The Caprivi™ is designed for Africa and the Talkeetna™ is ready for the weather of Alaska. The model 8400 Caprivi has a AA-grade French walnut stock with a hand-rubbed oil finish, 24 LPI wrap-around checkering, ebony forend cap, and a traditional pancake cheek

piece. The Talkeetna has a stainless-steel barreled action and reinforced composite stock. Both the Caprivi and Talkeetna have a full-length Mauser claw extractor for true controlled-round feeding and extraction, plus a 3-position safety. A barrel band sling swivel stud will not contact the forward hand during recoil. Front sights on both rifles are hooded and adjustable for elevation. These are the best production dangerous-game rifles available.

VARMINT

THIS MODEL
FEATURES

STOCK
A-grade walnut sporter stock with 20 LPI, hand-finished checkering.

VARMINT AND HEAVY-BARRELED rifles must deliver pinpoint accuracy with absolute consistency regardless of field conditions. This group of Kimber rifles ensures that level of performance through a combination of match-grade components, careful bedding and proper design. Light to heavy, there is a Kimber Varmint rifle for any type of predator hunting or varmint

shooting. Varmint™ and Pro Varmint™ models are perfect for hunters who move and call. The Varmint configuration has a heavy target stock shaped from ultra-stable, laminated wood blanks. Both models have sculpted, steel bottom metal with a floorplate release inside the trigger guard, which is both functional and elegant.

The features detailed on these pages are offered in addition to the standard features found on every Kimber rifle listed on page 51.

KIMBER BUILDS no-compromise tactical rifles to help meet the requirements of military and law enforcement professionals. Kimber tactical rifles have match-grade barrels, chambers, and triggers for the highest degree of accuracy. Advanced Tactical SOC II rifles ship with a McRees Precision custom stock for Kimber in two color options: FDE and Sniper Gray. These rifles feature a left-folding stock, allowing for bolt

manipulation while folded, a 4-point adjustable cheek weld for a versatile level of personalization, M-LOK® slots, tripod mount and stock pack. The match-grade dimensions of the Advanced Tactical™ SOC II and Advanced Tactical SRC II barrels are verified with an air gauge to ensure accuracy, and every rifle is built by hand, guaranteeing they have fired 3-shot groups measuring .5 MOA prior to shipping.

▷ PEPPERBLASTER II

THIS MODEL
FEATURES

SOLUTION
A powerful solution of 10% Oleoresin Capsicum (OC) combines with benzyl alcohol to create the most effective inflammatory agent available. Effects are immediate and last up to 60 minutes.

SPEED
PepperBlaster® II uses patented Jet Protector Technology to propel two separate blasts of potent OC at 112 mph. This speed keeps each blast on target and reduces the risk of blowback or drift. Unlike sprays, PepperBlaster does not lose pressure over time.

UNWAVERING
The non-aerosol pyrotechnic delivery system is not affected by cold or heat and blasts straight through wind and rain. This delivery system is capable of accurate placement and enough force to wrap-around glasses or penetrate masks.

RANGE
PepperBlaster® II has an effective range of up to 13 feet, stopping threats at a distance. The unit does not have to be vertically indexed like sprays and can be fired from any angle or position.

PEPPERBLASTER II
RED

Holsters and other PepperBlaster II accessories are available through Kimberamerica.com

▷ RIMFIRE CONVERSION KIT

RIMFIRE TARGET
CONVERSION KIT
.22 LR

THIS MODEL
FEATURES

SIGHTS
Adjustable, serrated rear sight with white-dot front sight.

SIZE
Fits 4- (Pro models) or 5-inch (Custom models) 1911s.

SHOOTING A RIMFIRE is an effective way to teach new shooters and enhance the training of others, regardless of their level of experience. Kimber's Rimfire Target Conversion Kit™ (fits 4- and 5-inch barrel models) and Rimfire Compact Conversion Kit™ (fits 3- and 4-inch barrel models) are compatible with Kimber and most other mil-spec 1911 pistols. Conversion kits are designed to operate with high-velocity .22 LR ammunition. Adding a Rimfire Conversion Kit to any 1911 gives you two pistols in one and pays for itself in just a few hundred rounds.

KIMBER E-SHOP
STORE.KIMBERAMERICA.COM

MAGAZINES & SPEEDLOADERS. Kimber® pistol magazines are available in an assortment of styles and calibers. 1911 magazines fit Kimber pistols, as well as almost any other brand and model of mil-spec 1911 pistols. The KimPro® Tac-Mag®, which is the finest 1911 .45 ACP magazine on the market, features large round-count holes and includes three base pads built around a quick-change system. Magazines, some with increased ammo capacity, are also offered for the Micro™, Micro 9™, R7 Mako™, and EVO SP™ product lines. The K6s™ can also be reloaded using the available speedloader.

GRIPS. Kimber offers premium grips and Crimson Trace Lasergrips® for Kimber 1911, Micro™ and Micro 9™ pistols, and many showcase hand-cut checkering and hand finishing. Grips for our revolvers and grip panels for the EVO SP™ pistols are also available.

KIMBER-BRANDED GEAR. Kimber offers an ever-expanding variety of Kimber-branded apparel and gear. Visit store.kimberamerica.com to see the full collection.

HOLSTERS. An assortment of holsters and magazine carriers bearing the Kimber logo are available for all current handguns.

RIFLE ACCESSORIES. A wide selection of bolt handles, magazines, slings, scopes and scope-mounting systems, and additional items are available to craft your ideal rifle setup.

KIMBER® PISTOLS AND RIFLES are shipped with a California-approved cable lock as a safety measure. Additionally, 1911 pistols are shipped in a lockable high-impact case, and Micro, EVO SP, and K6s handguns are shipped in a lockable soft case. Use of the cable lock is encouraged at all times when a firearm is in storage. Kimber owners may request a free cable lock by mail. Please contact our customer service department at 888-243-4522.

Kimber firearms and less-lethal products should only be purchased and used in complete compliance with all laws; national, state and local. All suggestions for use in this catalog, or in any Kimber literature, must be taken within the context of these laws. Customers and dealers are required to comply with all applicable laws.

All Kimber centerfire 1911 pistols include the Loaded Chamber Indicator Port® feature. When a round is in the chamber and light is available, the brass or silver color of the shell casing should be visible through the port in the barrel hood. This feature is another example of Kimber’s commitment to firearm safety. However, one must never assume a firearm is unloaded until both the chamber and magazine are empty and the magazine is removed. Even then, all established rules of firearm safety must always be followed. Micro pistols do not have the Loaded Chamber Indicator Port® feature.

Firearm safety is every gun owner’s responsibility. Use and store all firearms safely. Teach everyone in your home, especially children, proper firearm safety.

Kimber less-lethal products contain a strong irritant (inflammatory agent) derived from cayenne peppers. Avoid contact with skin and eyes. In case of contact, flush with water for at least 15 minutes. Seek immediate medical attention if symptoms persist or worsen. Always keep Kimber less-lethal products out of the reach of children. There is risk of injury to eyes if used at less than the minimum safe distances specified in the product instruction manual. Kimber less-lethal products may be unlawful to own or possess in some states and jurisdictions. Check with your state and local authorities. Use of Kimber less-lethal products for any purpose except lawful self-defense may be a crime. U.S. PAT. 6,951,070B2.

Certain products may not be available for sale in certain states.
