2020

CALIFORNIA COMPLIANT

WHAT ALL GUNS SHOULD BE™

UNEQUALED QUALITY.

EVEN BEFORE THE FIRST KIMBER® rifle was completed some 41 years ago, manufacturing firearms of unequalled quality was already Kimber's singular goal. Do this, it was reasoned, and everything else will fall in line. On the strength of that commitment, Kimber has become the world's largest

producer of 1911 pistols and the market leader in classic hunting rifles. Quality is the true measure of value. Whether it means accuracy or dependability, the beauty of a finish or the precise fit of wood to metal, quality is an integral part of every Kimber.

HANDGUN SELECTION GUIDE

SUGGESTED USE ICONS

Below and on the following pages you will find a suggested use based on the size and features of each gun. This icon does not necessarily mean a certain firearm is not suitable for other uses. Visit our website or call our customer service staff for questions.

CARRY

The features and size of these firearms are well-suited for personal defense situations.

HOME DEFENSE

The features and size of these firearms are well-suited for in-home defense.

MULTIPLE USE

These firearms are suitable for use in a variety of spaces, in and outside of the home.

TARGET

Topped with adjustable sights, these 1911s are well-suited for competition or a day at the range.

LE

The features on these firearms make them an excellent choice for duty carry.

HUNT

These models are well-suited for backcountry camp protection and handgun hunting.

ULTRA™ models are easy to conceal and comfortable to carry with their 3-inch bull barrels and short grips. Most frames are made from aluminum rather than steel to reduce weight. While light pistols do have a slight increase in felt recoil, this is minimized by Kimber's recoil system and unequaled 1911 ergonomics. Ultra pistols are the smallest and lightest 1911 pistols offered today, but Kimber quality helps ensure this does not compromise either dependability or accuracy.

- Barrel is just 3 inches long for easy concealment
- Short grip for concealability and comfortable carry
- Most Ultra models weigh just 25 ounces

COMPACT models blend the short grip of the Ultra with the longer 4-inch barrel of Pro models. The longer barrel increases the distance between the sights for more consistent aiming. It also gives an increase in velocity, and additional weight improves balance and reduces felt recoil. Compact models are ideal for shooters with smaller hands and work well for concealed carry or home defense.

- Barrel is 4 inches long for better balance and extra velocity
- Short grip for easier carry and concealment
- Lighter weight for more comfortable carry

K6s® models have a 6-round capacity, compact frame and cylinder, and a 2- or 3-inch barrel. Edges are rounded and blended so they are less likely to hang up on clothing. For those that require power in a small package with mild recoil, the K6s fits the bill as it is designed to handle both .357 Magnum and .38 Special +P ammunition. This makes them well-suited for backup or concealed carry.

- Compact 6-round capacity cylinder
- 2- or 3-inch barrel
- Ergonomic grip design for easy recoil control

PRO™ models may be the best all-around 1911 configuration, combining a 4-inch barrel with a full-length grip. It is certain to be an ideal choice for concealed carry, personal defense or general use. Some have lightweight aluminum frames while others have heavier steel frames, and two models include the Kimber Tactical Rail™ for mounting lights and accessories. All have a near-perfect balance that makes shooting them easy, accurate and fun.

- Barrel is 4 inches long to optimize balance and concealability
- Full-length grip fits shooters with larger hands
- Frame options permit a model selection that meets multiple needs

CUSTOM™ models are full-size 1911 pistols featuring a 5-inch barrel and full-length grip. The most popular configuration, they are favored by law enforcement professionals and competition shooters. Slightly heavier and with a greater distance between sights, they are easier to shoot accurately and have reduced felt recoil. The slim profile and outstanding 1911 ergonomics make them well-suited for duty, personal defense and general use.

- Full-length grip fits shooters with larger hands
- Barrel is 5 inches long for optimal velocity and accuracy
- Wide selection of models for any application

TRUST IS NOT GIVEN LIGHTLY,
IT'S EARNED IN THE FIELD

ACCURACY, DEPENDABILITY and meaningful features determine the true quality of a pistol. On the strength of quality, Kimber® has become the world's largest pro-

ducer of 1911 pistols. Compare a Kimber 1911 with any other brand—or any other type of semi-automatic—and see why Kimber is What All Guns Should Be™.

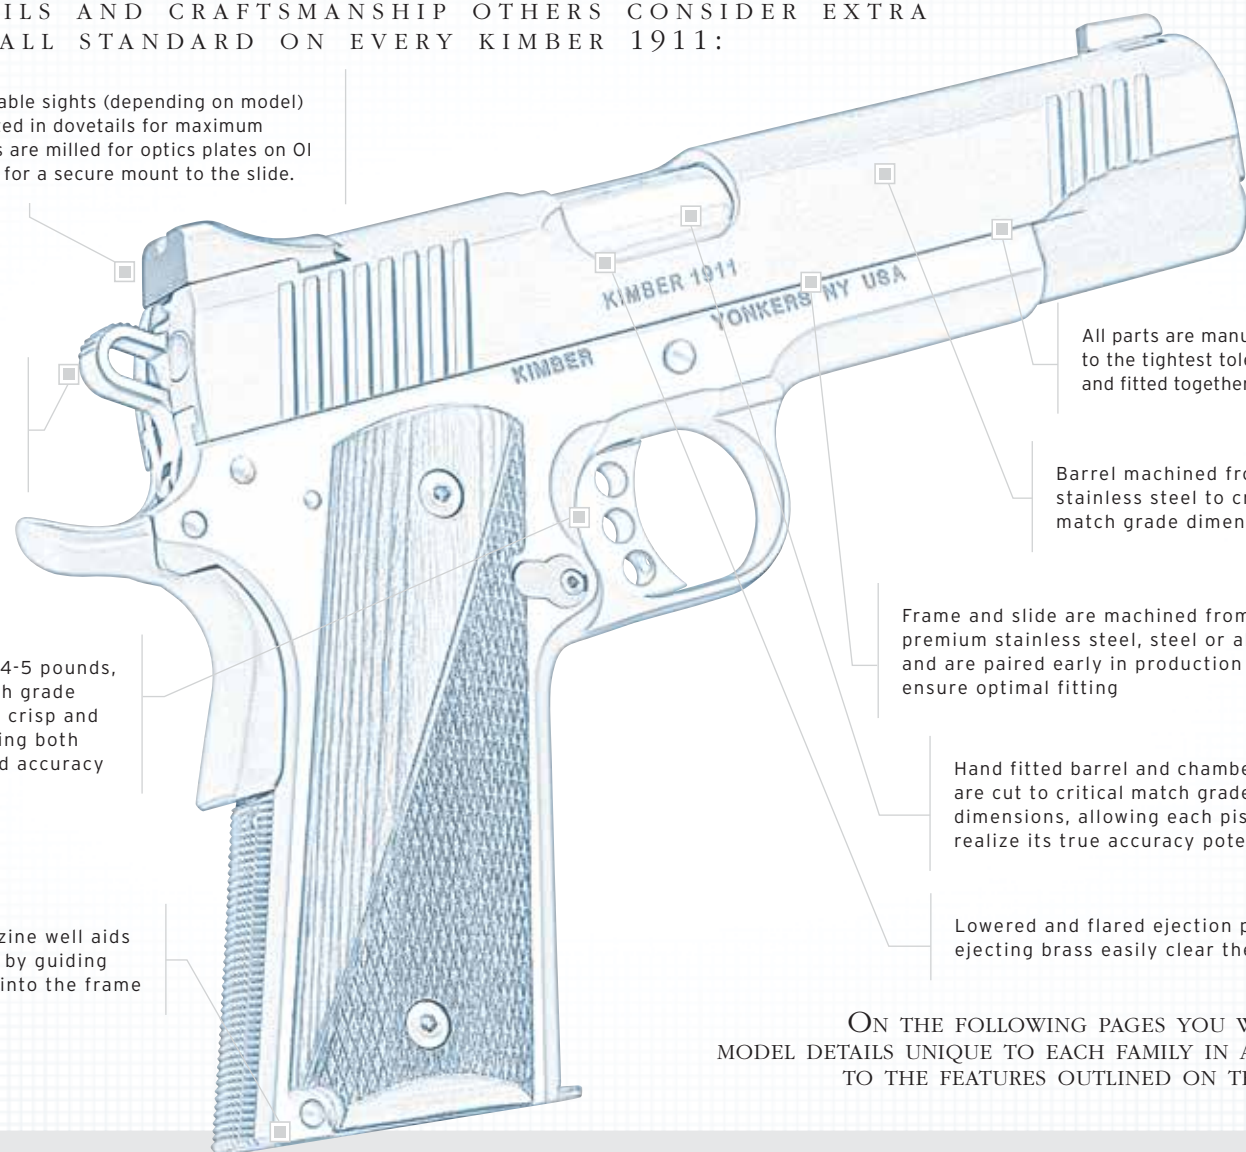

DETAILS AND CRAFTSMANSHIP OTHERS CONSIDER EXTRA
WE CALL STANDARD ON EVERY KIMBER 1911:

Fixed or adjustable sights (depending on model) securely mounted in dovetails for maximum integrity. Slides are milled for optics plates on OI and OR models for a secure mount to the slide.

Commander-style hammer will not cut or snag

With a pull of 4-5 pounds, Kimber's match grade trigger breaks crisp and clean, increasing both confidence and accuracy

Beveled magazine well aids fast reloading by guiding the magazine into the frame

All parts are manufactured to the tightest tolerances and fitted together by hand

Barrel machined from solid stainless steel to critical match grade dimensions

Frame and slide are machined from premium stainless steel, steel or aluminum and are paired early in production to help ensure optimal fitting

Hand fitted barrel and chamber are cut to critical match grade dimensions, allowing each pistol to realize its true accuracy potential

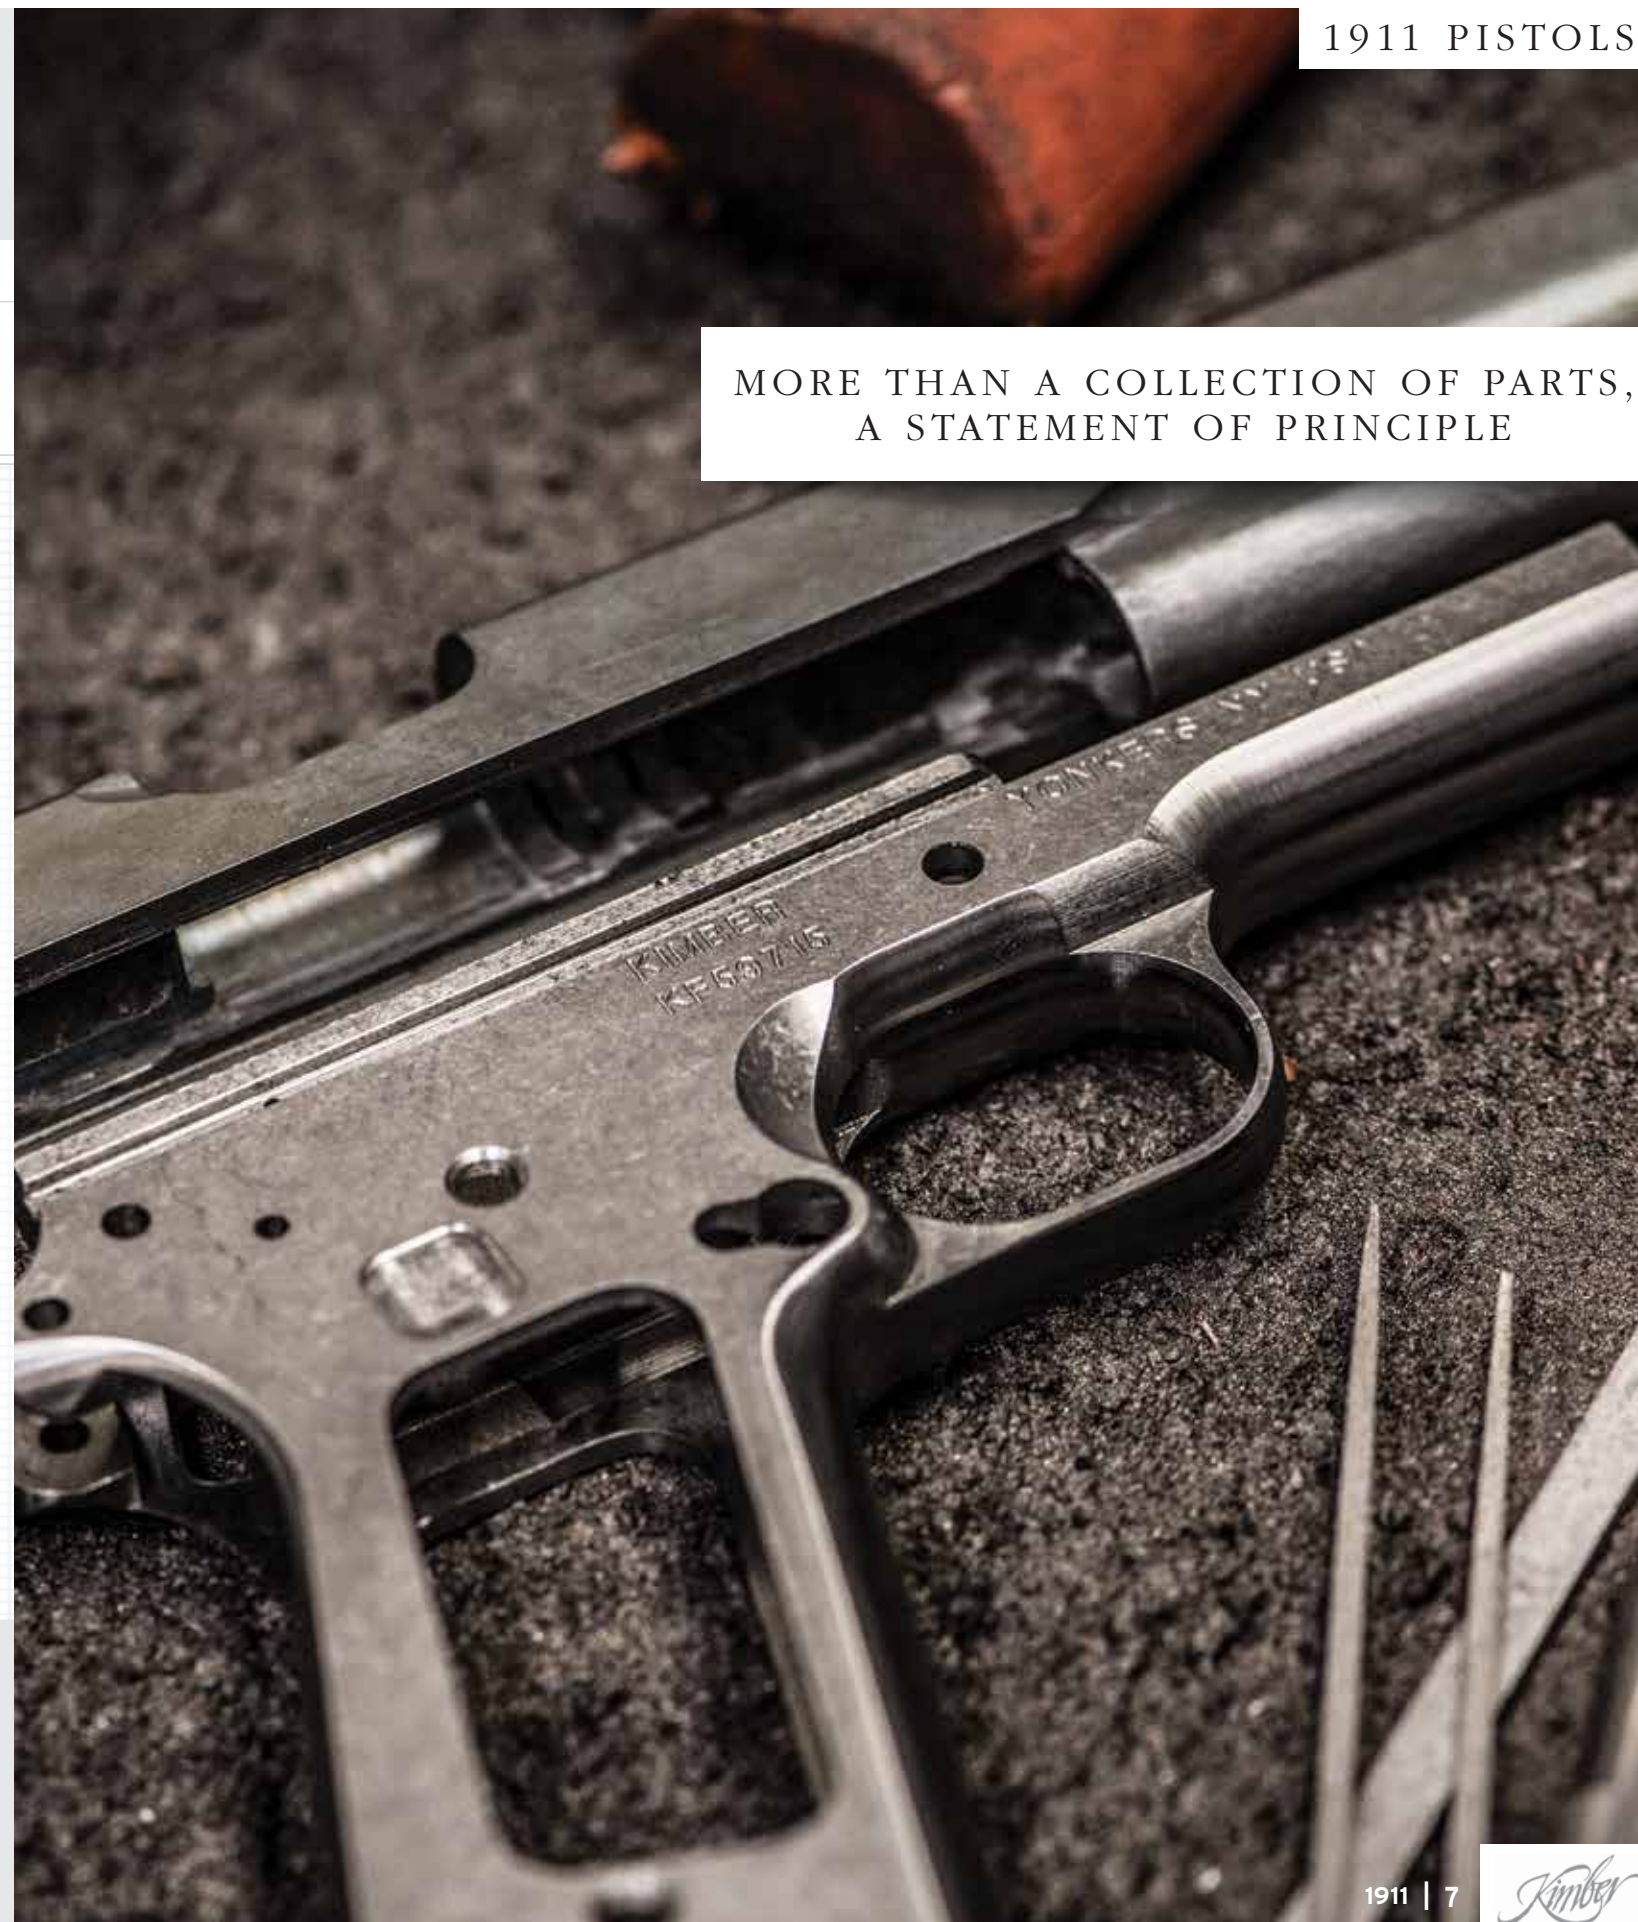

Lowered and flared ejection port lets ejecting brass easily clear the slide

ON THE FOLLOWING PAGES YOU WILL FIND
MODEL DETAILS UNIQUE TO EACH FAMILY IN ADDITION
TO THE FEATURES OUTLINED ON THIS PAGE.

Kimber® builds the world's finest 1911 pistols to the tightest tolerances right here in America. Moreover, each critical component is manufactured inside the Kimber factories; getting it right means doing it yourself. The finest raw materials form the foundation and Kimber does the rest, ensuring every part meets unequalled standards. America's best shooters, including legendary SWAT units and United States Marines assigned

to the U.S. Special Operations Command, have chosen Kimber for its quality, dependability and accuracy. So should you. Descriptions of each Kimber 1911 family of pistols are presented throughout the following pages. To locate your nearest Kimber Master Dealer or find complete descriptions of each model pictured in this catalog, visit kimberamerica.com.

MORE THAN A COLLECTION OF PARTS,
A STATEMENT OF PRINCIPLE

CUSTOM II

THE ACCURACY, dependability and renowned Kimber features of this family set the standard against which all other 1911 brands and models are measured. Their legendary performance has made Kimber the world's largest producer of 1911 pistols. The Ultra Carry II and Stainless Ultra Carry II continue that tradition, but in a smaller,

highly concealable package. Built with lightweight aluminum frames and steel slides topped with red fiber optic, or night sights. Highly concealable 3-inch barrels make these a true star for every day carry. Combine these foundations with the slim nature of the 1911 and you have the cornerstone in carry and concealability.

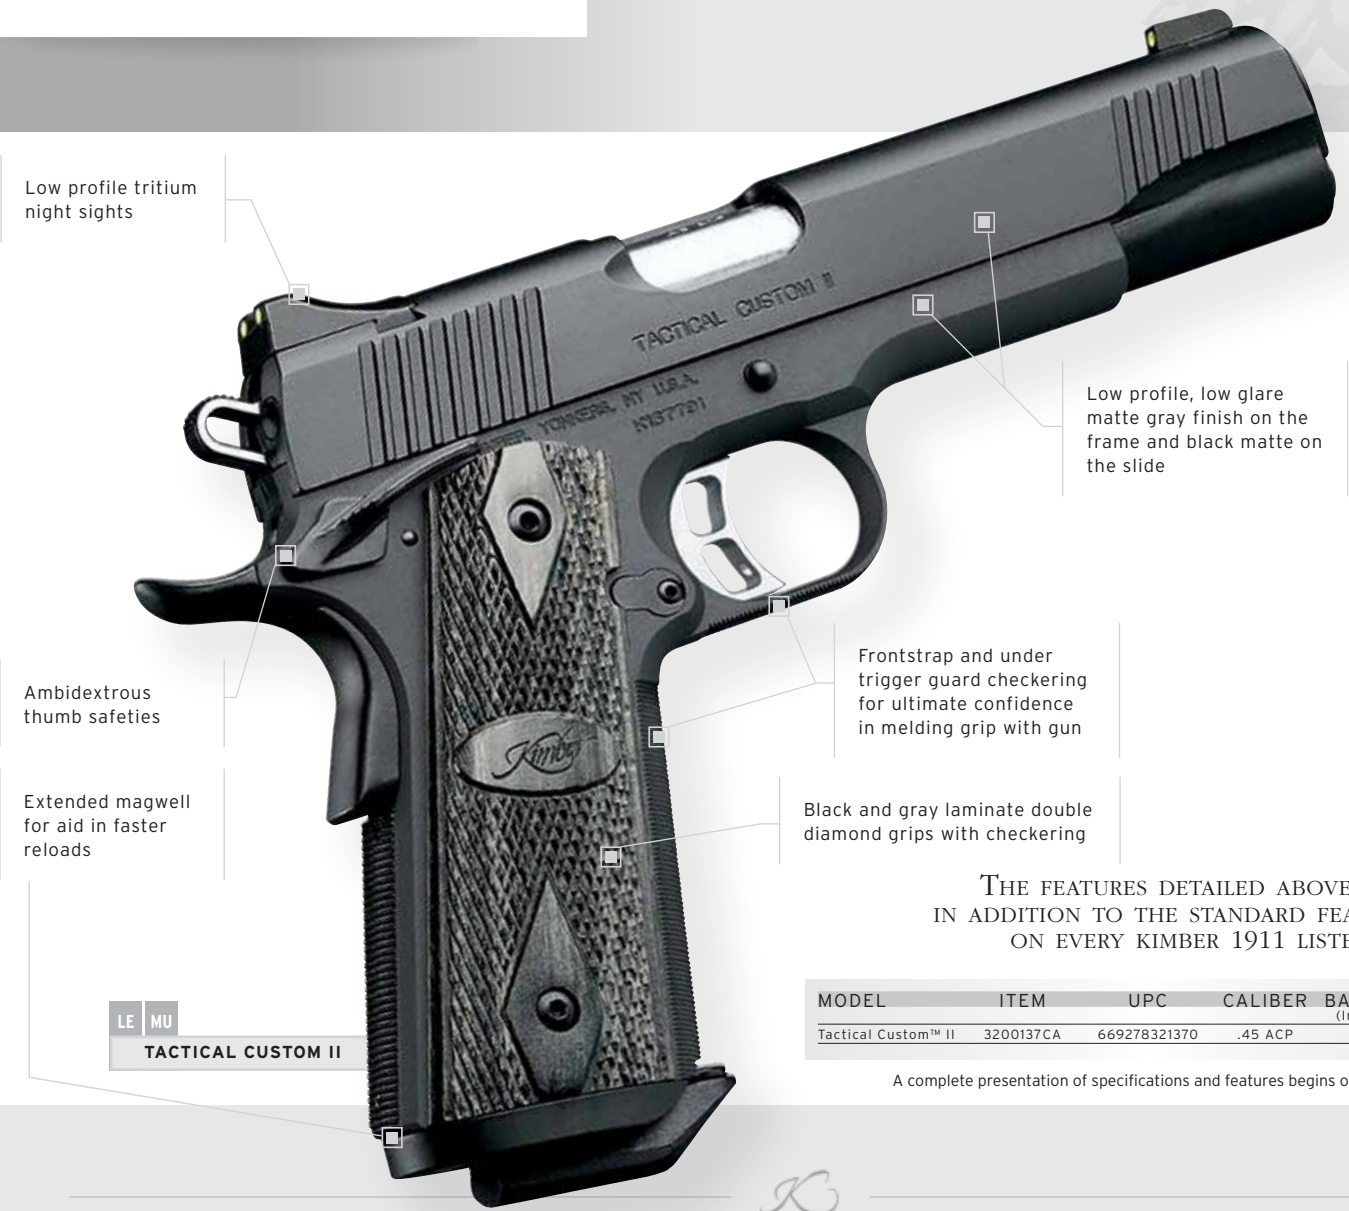

THE TLE (Tactical Law Enforcement) family of pistols is well-suited for duty carry, tactical applications and personal protection. Created for and in cooperation with law enforcement and military experts, TLE models are professional tools outfitted with performance-enhancing features that also

meet the defensive pistol needs of civilians. Born from those who refuse to compromise, carried by those who demand more from their pistols, when you carry a TLE, you carry with absolute confidence.

TACTICAL II

Ambidextrous thumb safeties

Extended magwell for aid in faster reloads

READY FOR ANYTHING. Kimber Tactical pistols have the performance-enhancing features demanded by law enforcement professionals. Wearing tritium night sights, frontstrap and undertrigger guard checkering, an extended magwell to aid in faster reloading, and ambidexterous thumb safeties, these purpose-built pistols

leave nothing out. Kimber Custom Shop aluminum trigger breaks crisply at 4-5lbs. Like all Kimber pistols, each has rounded and blended edges to prevent snagging, along with match grade barrels, chambers and triggers. Full featured, the Tactical Custom II is the finest example of a tactical response pistol offered.

ULTRA COVERT II PISTOLS are the perfect combination of light weight and meaningful features. With a Flat Dark Earth color palette, flush-cut barrel and Round Heel Frame on Ultra models, Covert pistols feature both Crimson Trace Lasergrips® and Tactical Wedge tritium night sights; two sight systems that will ensure you acquire your sight picture regardless of light conditions. The 30 lines-per-inch

front strap checkering with a bordered base helps ensure a positive grip even with cold, wet or gloved hands. The Carry Melt™ treatment rounds and blends all edges so they will not snag on clothing or holsters. A bumped and grooved beavertail grip safety provides control under stress. Kimber Covert quality ensures unequaled accuracy and dependability; there is no reason to be afraid of the dark.

CDP II

CDP (CUSTOM DEFENSE PACKAGE) II pistols combine all the best carry features into a package that gives them their name. Adding these features during production reduces the price of these pistols by over \$600, making them an incredible value. Featuring tritium night sights dovetail mounted on a stainless steel slide, flush cut barrel, and the lightweight aluminum frame has 30 lines-per-inch checkering on the front strap and trigger guard. The frame, slide and small parts

wear our KimPro® II finishes that are self-lubricating and resistant to moisture and salt. The Carry Melt™ treatment rounds and blends edges so they will not hang up on clothing. Available in 4 sizes and configurations for any concealed carry or personal defense application, CDP II pistols have no equal for carry and defense—just what you expect from Kimber.

RAPTOR PISTOLS TAKE their name from a combination of aggressive slide and frame serrations, feathered logo grips and special scaled texturing accents. While this patented design is unique, the features, dependability and accuracy are pure Kimber. Tritium night sights, ambidextrous thumb safety and a

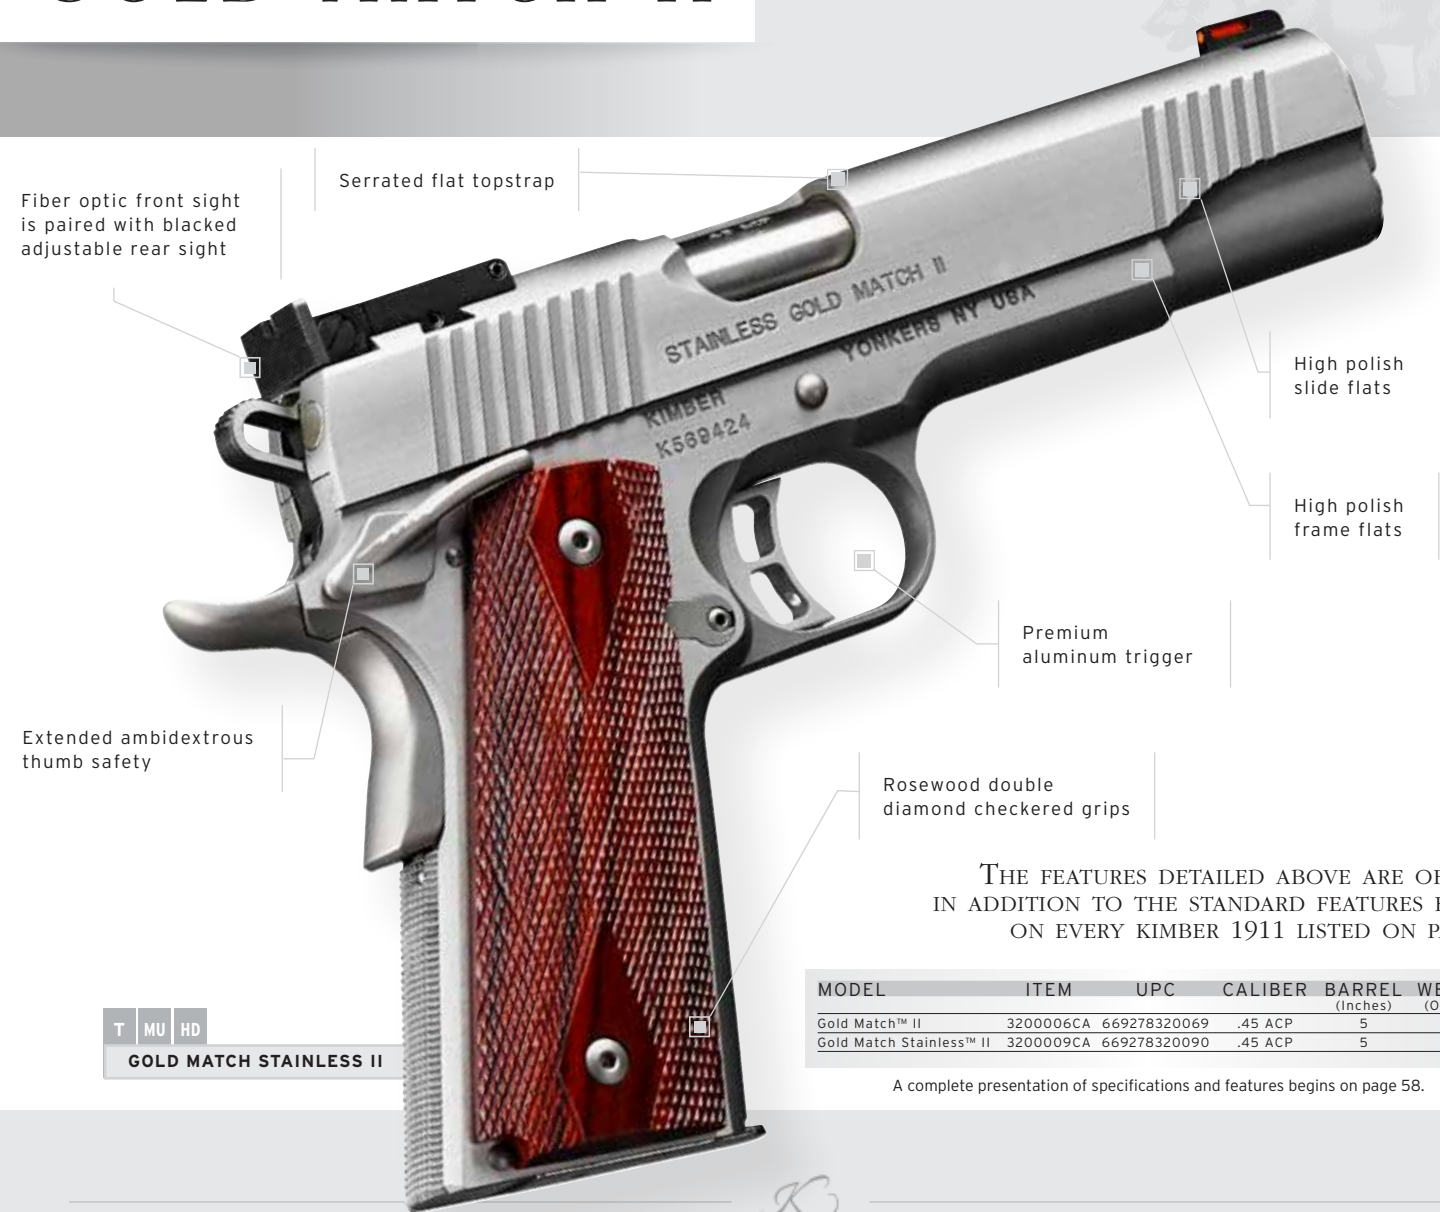

bumped and grooved grip safety are all standard with the Raptor family. Stainless Raptors offer a choice of calibers, 9mm or .45 ACP. The quality of the Kimber 1911 rivals America's finest gunsmiths; hold a Raptor and see for yourself.

PERFORMANCE has never looked so good. Kimber Eclipse pistols have a striking brush-polished finish and special custom shop features. Custom Shop additions include 30 lines-per-inch checkering on the front strap and a Premium Aluminum Trigger™.

While the Eclipse finish is striking, performance is what matters. All models can be chambered in .45 ACP, and the Eclipse Custom II is also available in 10mm. All models are completed with laminated gray/black double diamond grips.

WHEN QUALITY MATTERS

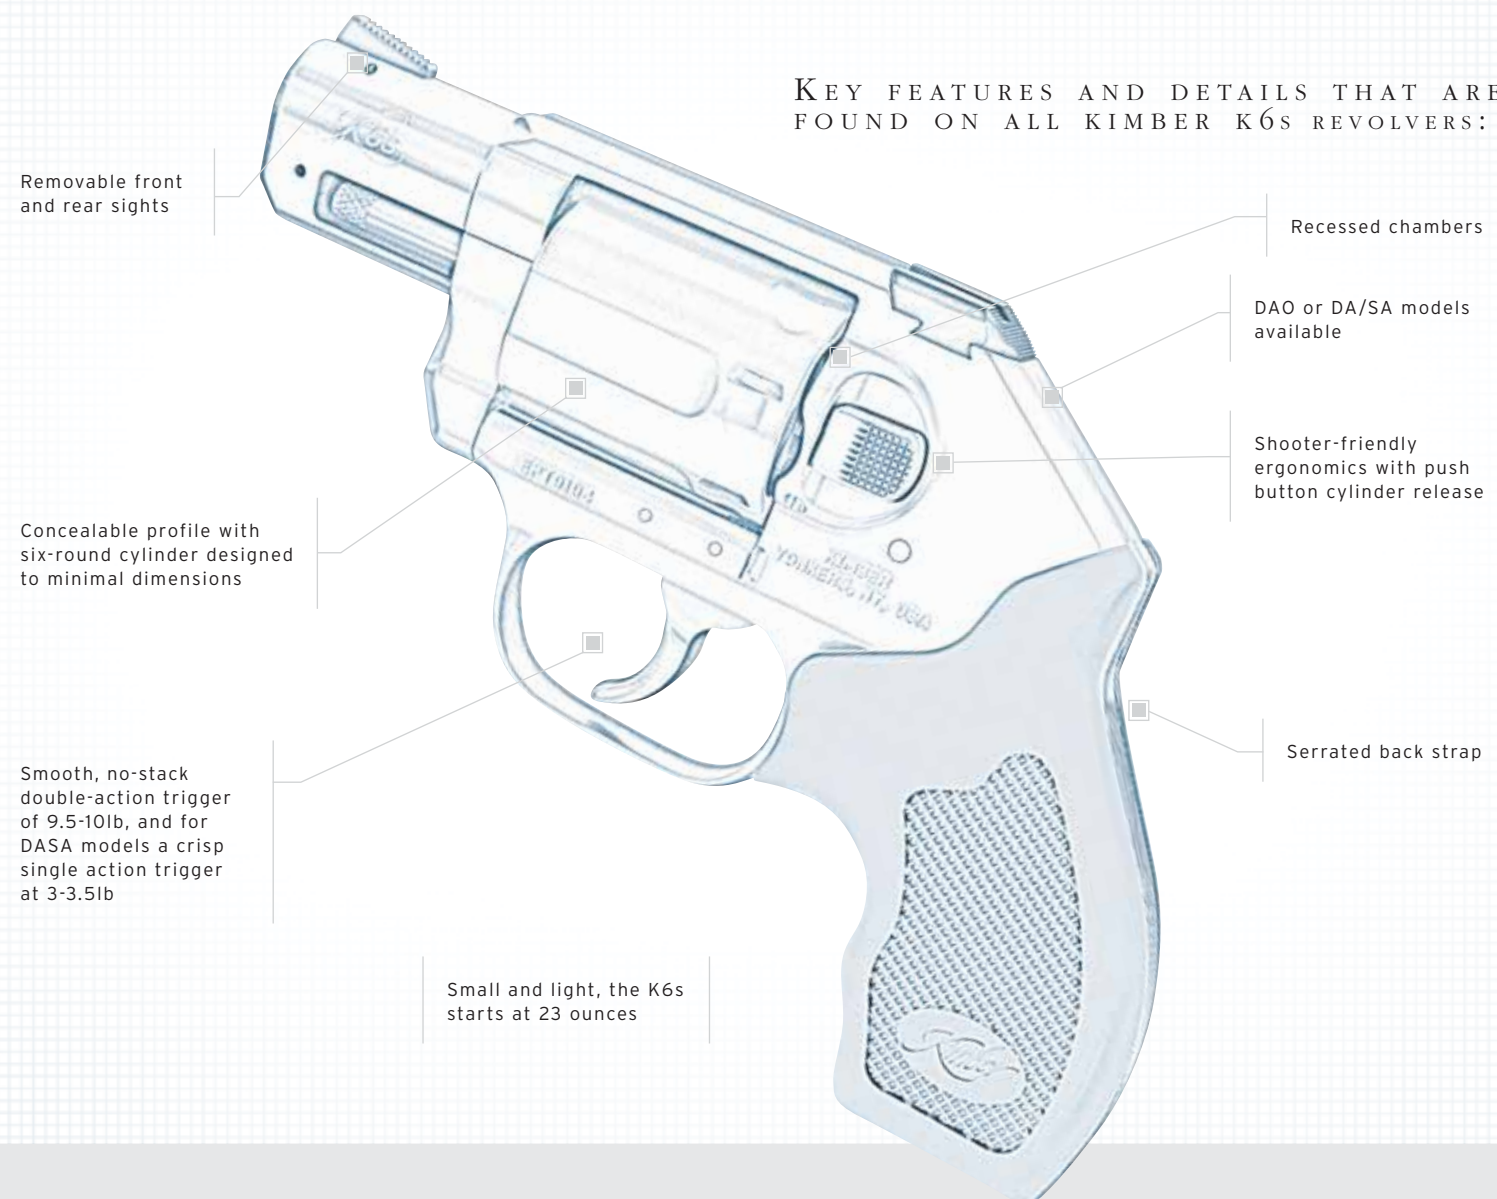

K6s REVOLVER

KIMBER K6s™ REVOLVERS set the bar for concealed carry revolvers by bringing an unmatched level of performance and shootability to concealed carry. Compact and light with the

smallest .357 Magnum cylinder ever offered and a light, no-stack trigger, the K6s blends superior ergonomics and simple operation. Kimber K6s is the revolver of the next generation.

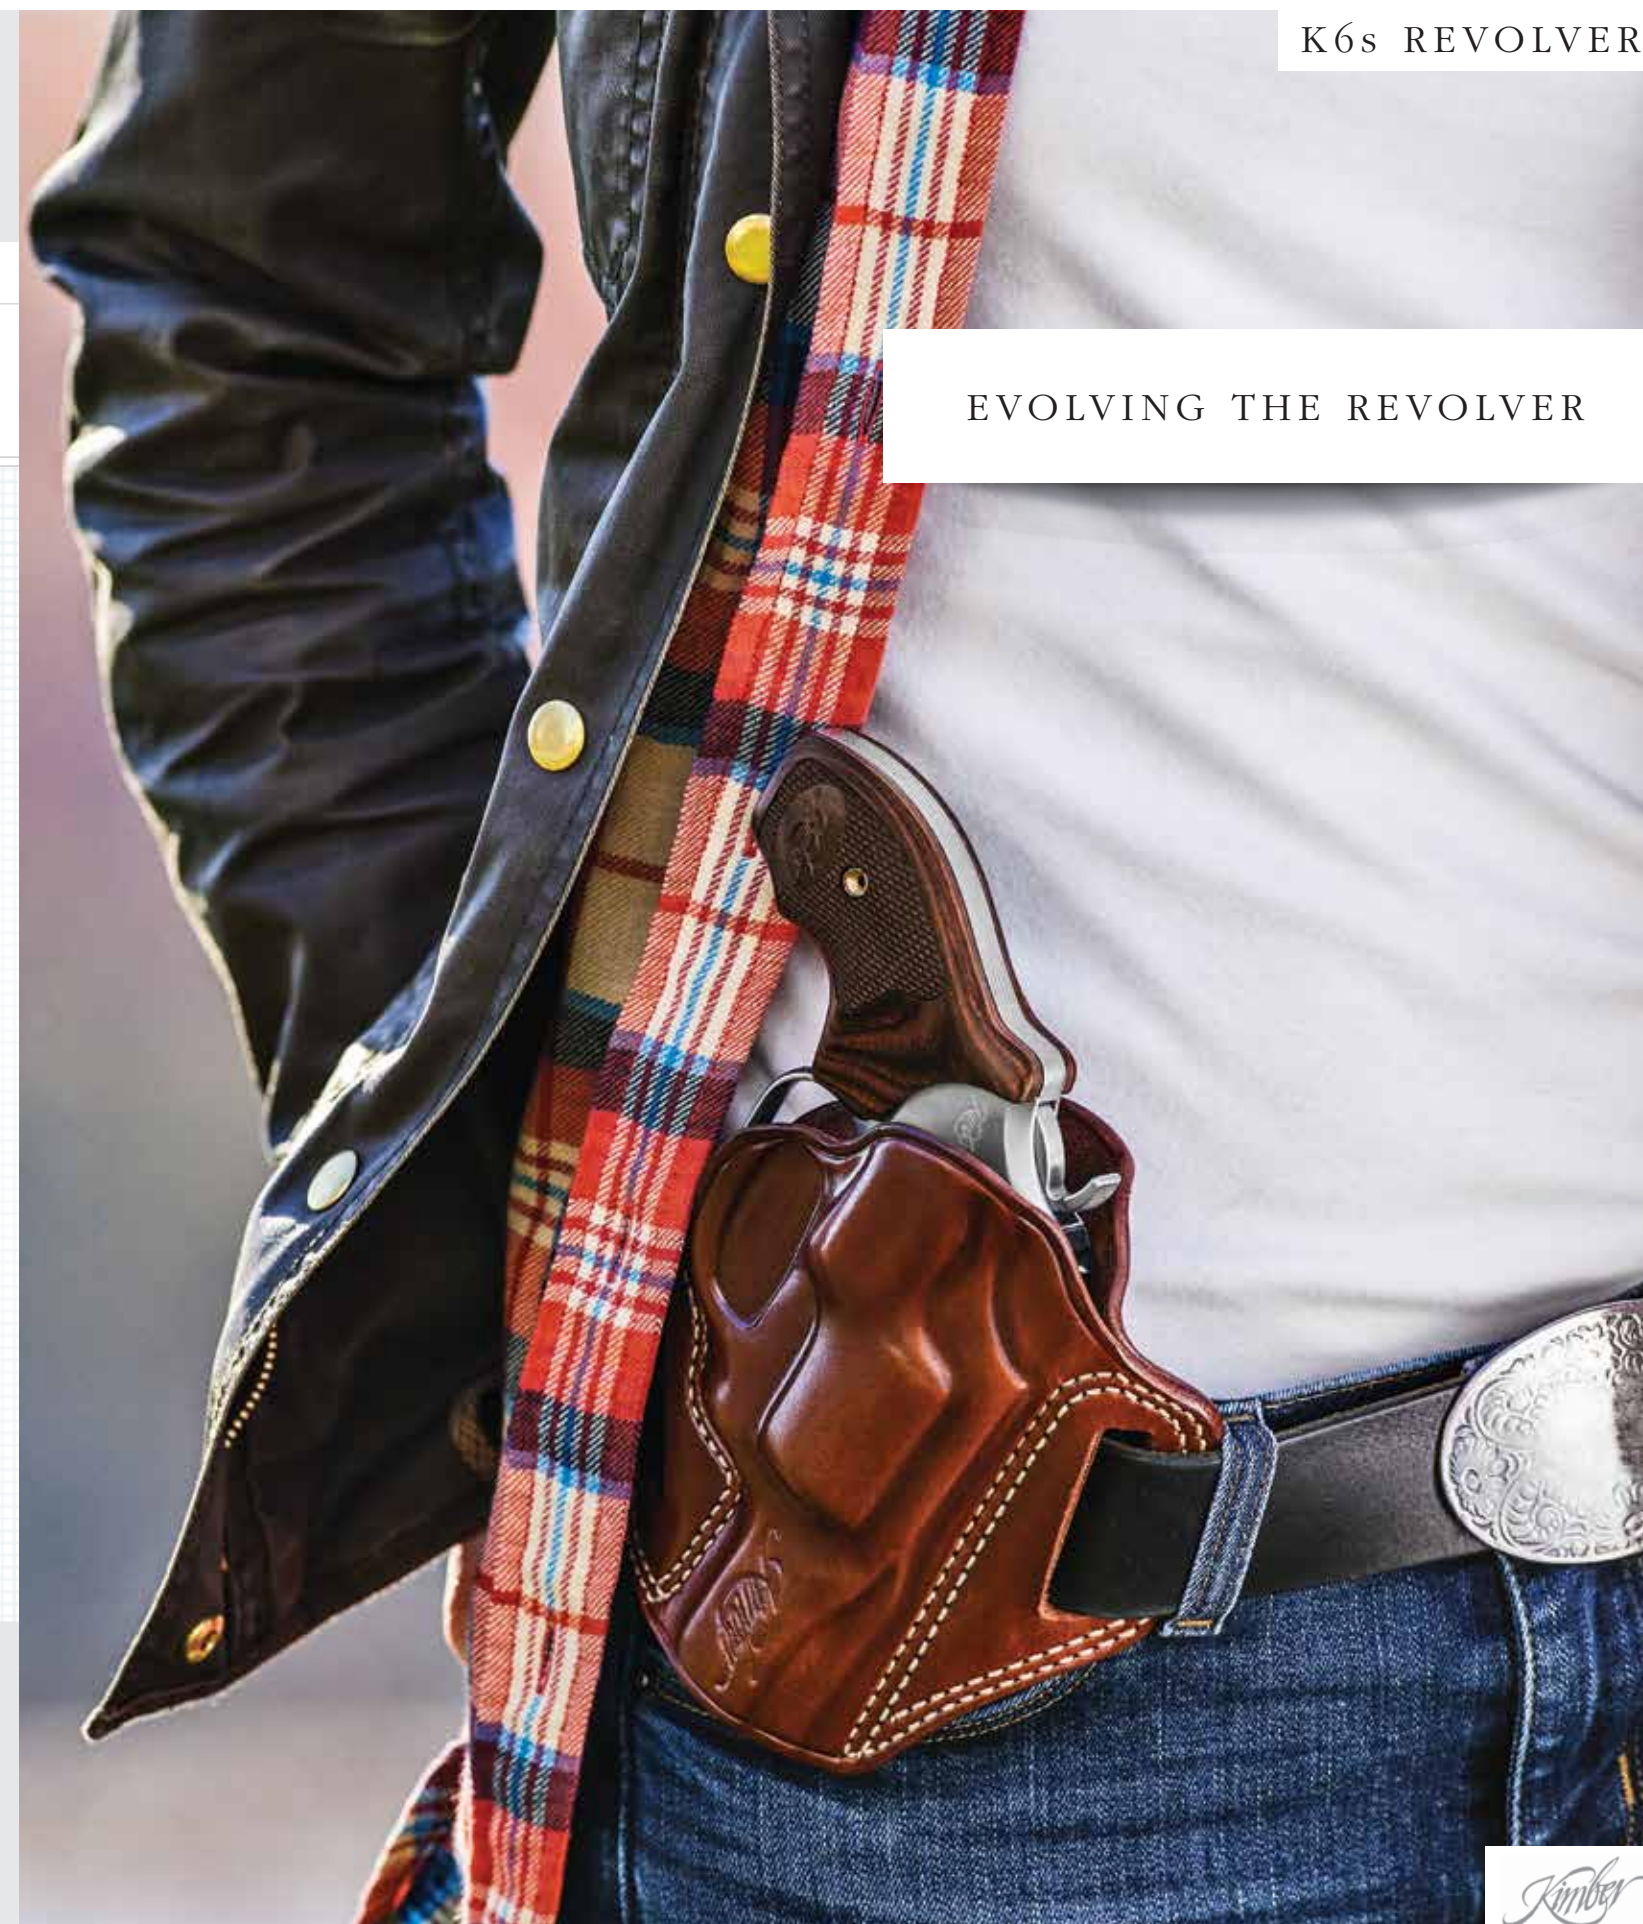

EVOLVING THE REVOLVER

KEY FEATURES AND DETAILS THAT ARE FOUND ON ALL KIMBER K6s REVOLVERS:

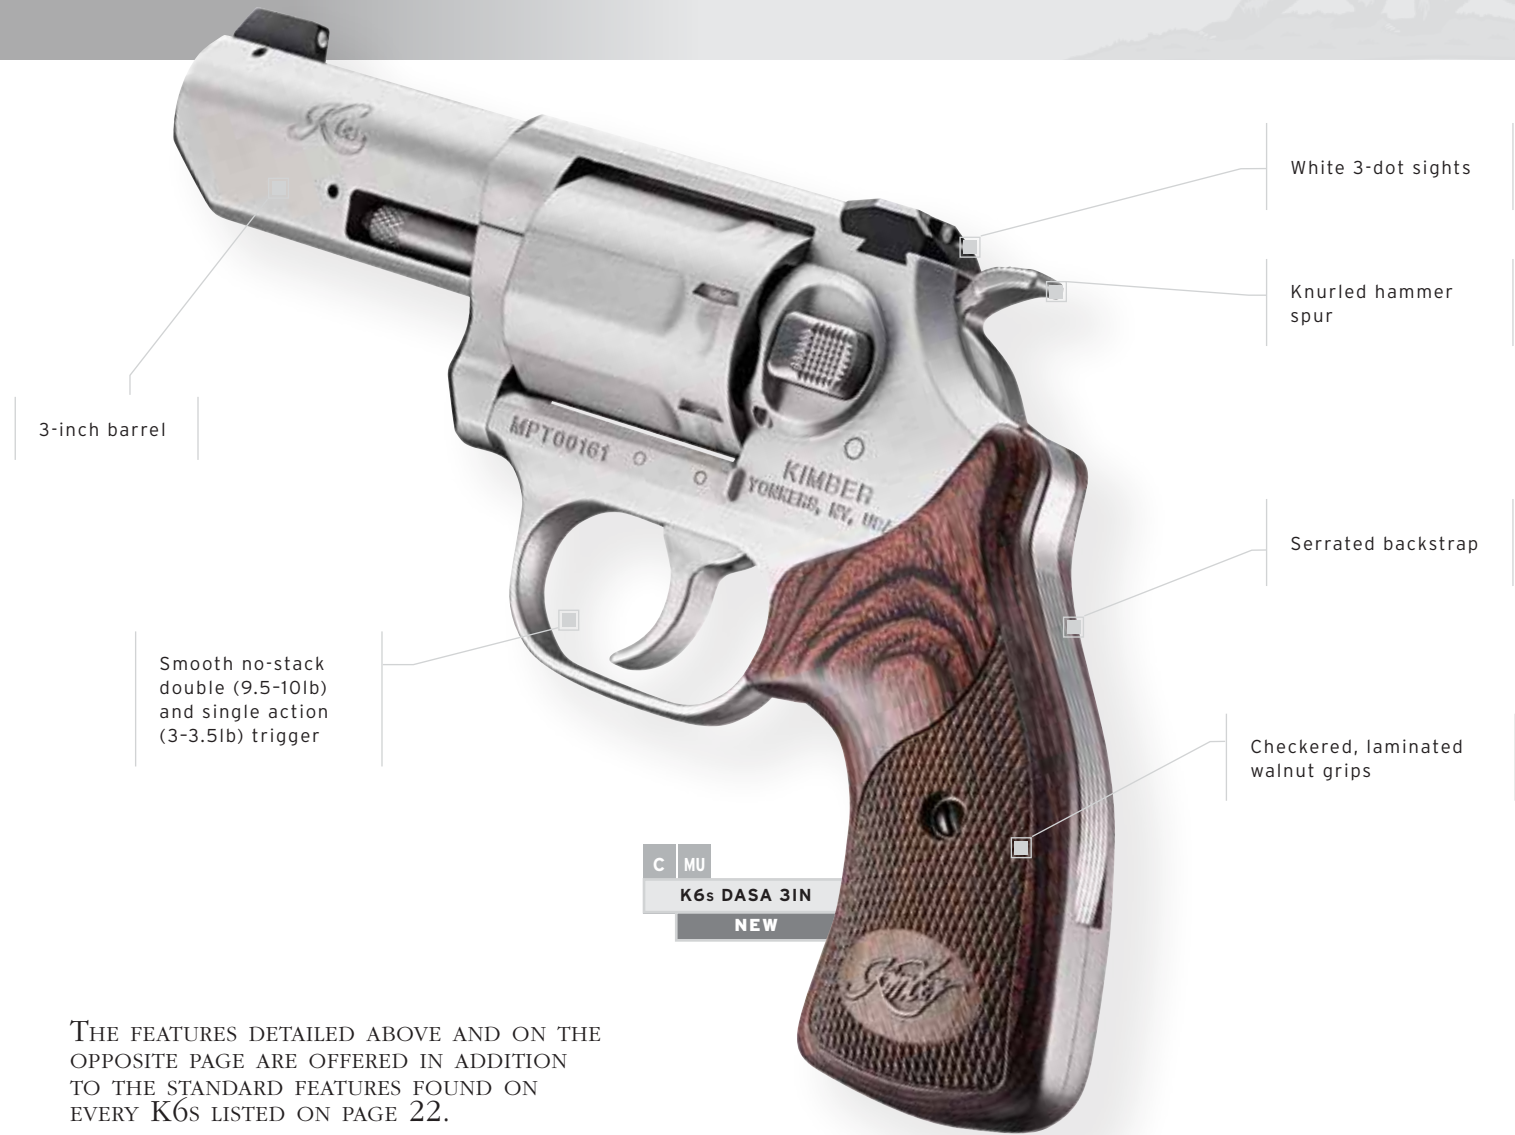

THE KIMBER K6s™ IS AMONG THE MOST ACCURATE, shootable and dependable compact revolvers available today. Delivering on size and power, the K6s is the smallest 6-shot revolver on the market today that is specifically designed to fire .357 Magnum defensive

ammunition. Mild recoil and a smooth double-action trigger pull make these revolvers a pleasure to shoot. Kimber engineers pushed the envelope to create the smallest and most comfortable .357 Magnum ever.

84M

8400 SM

- 84M ACTION FEATURES**

 - The 84M (Medium) action has minimal dimensions for cartridges ranging from .204 Ruger to .308 Win.
 - As part of the lightest production rifles available today, this action is built for short bolt travel and allows for faster operation
 - Barrel is an optimal length for the flattest trajectory and superior accuracy
 - Magazine capacity is 3-6 rounds, depending on caliber chambering
 - Available in 9 models and 8 calibers
- 8400 SM ACTION FEATURES**

 - The 8400 SM (Short Magnum) action sized for Short Magnum cartridges has a greater diameter but remains as short as possible to reduce weight and ensure proper balance
 - Barrel is the proper length for maximum velocity and flat trajectory
 - Ideal for almost any North American big game
 - Magazine capacity is 3-4 rounds, depending on caliber chambering
 - Available in 4 models and 4 calibers

84L

8400 LM

- 84L ACTION FEATURES**

 - The 84L (Long) action has the minimal diameter of the 84M but is slightly longer to fit America's most popular and powerful hunting cartridges, such as the .270 Winchester and .30-06 Springfield
 - The lightest rifle in its class
 - Barrel is an optimal length for the flattest trajectory and superior accuracy
 - Magazine capacity is 3-5 rounds, depending on caliber chambering
 - Available in 4 models and 3 calibers
- 8400 LM ACTION FEATURES**

 - The 8400 LM (Long Magnum) action has the additional length required by some of the world's most powerful cartridges, such as .300 Winchester Magnum and .375 H&H Magnum
 - Suitable for hunting both large and dangerous game
 - Barrel is the proper length for maximum velocity and balance
 - Magazine capacity is 3-5 rounds, depending on caliber chambering
 - Available in 5 models and 3 calibers

KIMBER RIFLES OFFER A COMBINATION OF FEATURES that set them apart from other production brands. Barrels, chambers and triggers are crafted with critical match grade dimensions for unmatched accuracy. All of Kimber's rifles are controlled round feed. Pillar and glass bedding add strength and ensure that nothing shifts under recoil or during rough use. Walnut stocks are finished and checkered by hand, and reinforced carbon fiber stocks are the

finest worn by any production rifle. Descriptions of each rifle family are presented throughout the following pages, and more than 2,000 Kimber Master Dealers across America stand ready to assist in the selection of a model that will meet your needs. To locate your nearest Kimber Master Dealer, find complete information on each model or view product videos, please visit kimberamerica.com.

THE KIMBER HUNTER offers our legendary accuracy and performance paired with a synthetic stock and removeable box magazine. Four models are available, the Hunter (Black) with barrel and receiver in low-profile, matte-black KimPro® II finish, the Hunter (Realtree™) in with a stock wrapped in Realtree Edge™ pattern, the Hunter (Boot Campaign) in Kryptek Highlander™, and finally the original Hunter with satin silver finished barrel and action. Paired with a barrel and action in

finish that controls light reflection and an incredibly popular pattern, the Hunter (Realtree Edge™) is a winning combination for our Eastern US hunters. Our Boot Campaign rifle carries the Boot Campaign logo engraved on the barrel, and a portion of the proceeds go directly to this charity that works to help veterans across the United States. Chambered in a wide selection of calibers, this rifle family offers the ideal combinations for any type of game.

A TRUE MOUNTAIN RIFLE must be light and accurate—hard-core hunters understand. Montana™, Adirondack™, and Mountain Ascent™ models are the lightest production big-game rifles ever offered, delivering legendary Kimber accuracy yet still weighing as little as 4 pounds, 13 ounces. Hand-laid carbon fiber stocks add strength, and stainless steel shrugs the elements. All Kimber Mountain rifles offer a threaded barrel for optional use of muzzle brakes and suppressors. Montana rifles combine all the best Kimber features in a lightweight, stainless steel and reinforced carbon fiber package that helps ensure performance. Adiron-

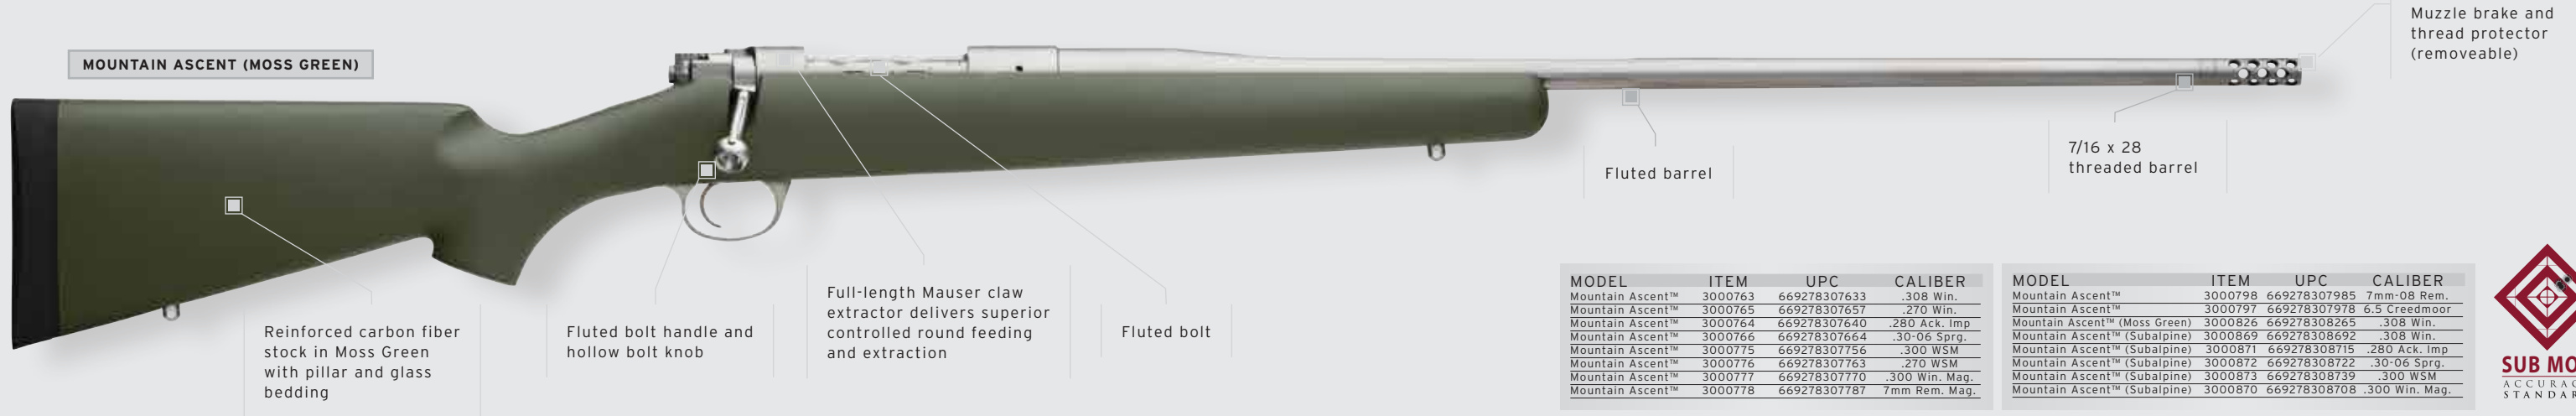

dack and Mountain Ascent models go even further. Featuring a combination of spiral fluted bolt body and hollow bolt knob, the Adirondack is compact for fast maneuvering. The Mountain Ascent has additional custom features, including a fluted barrel and muzzle brake to reduce felt recoil. Both wear Gore™ Optifade™ soft-touch stock treatments that blend into any environment and ship with Talley matte black ring mounts. Optifade ring mounts and muzzle brake accessories are available separately. These rifles have no equal.

OUR OPEN RANGE RIFLES are the culmination of the premier technologies being offered in premium hunting rifles. New for 2020, the Open Range Pro Carbon rifle line provides the perfect balance of style and performance. AG Composites, the industry leader in stock technology, provides a reliable platform that is ultralightweight, supremely stiff, and impervious to the elements. At the pinnacle of modern barrel science, Proof Research's stainless steel, carbon-fiber wrapped barrels

offer superior stiffness, reduced harmonic vibration, life-extending heat dissipation and 12 ounces of weight reduction. Single point cut rifling limits barrel stress and is preferred by many target shooters for its uniformity and close tolerances. Currently available in .308 Win. and 6.5 Creedmoor, the Open Range Pro Carbon rifles are true tack drivers for the most demanding hunter.

TRADITIONAL

THE FEATURES DETAILED ON THESE PAGES ARE OFFERED IN ADDITION TO THE STANDARD FEATURES FOUND ON EVERY RIFLE LISTED ON PAGE 30.

KIMBER'S TRADITIONAL BIG-GAME RIFLES offer an unequaled combination of features, elegance and performance. All actions have minimal dimensions for the cartridges they chamber, permitting a trim overall profile that reduces weight by as much as two pounds. All traditional rifles include critical design features that ensure performance and dependability. Stocks are borne of fine walnut and then checkered and finished by hand. The elegant pillar and glass bedded sporter stock is carefully shaped and

dimensioned from fine walnut for both recoil control and quick pointability. This properly dimensioned classic stock and recoil-absorbing 1-inch Pachmayr Decelerator® recoil pad diminish felt recoil. The Kimber-designed straight comb stock slides back into the shoulder, not up into the cheekbone. A sculpted steel bottom metal has a floorplate release inside the trigger bow that prevents accidental opening. Just as hunting is more than a sport, a Kimber traditional rifle is more than just a rifle.

Caprivi™	3000692	.375 H&H Mag.
Talkeetna™	3000706	.375 H&H Mag.

A complete presentation of specifications and features begins on page 59.

KIMBER DANGEROUS GAME rifles deliver unwavering reliability and charge-stopping energy. Equally important, they have critical features absent from other production rifles in heavy calibers. The Caprivi™ is designed for Africa and the Talkeetna™ is ready for the unpredictable weather of Alaska —places where Kimber quality takes on a whole new level of importance. The Model 8400 Caprivi has a AA-grade French walnut stock with a hand-rubbed oil finish, 24 lines-per-inch wrap-around checkering, ebony forend tip and traditional pancake cheek piece. It also has a 3-leaf island express sight with the fixed leaf regulated for 50 yards. The Talkeetna has a stainless steel barreled

action and reinforced carbon fiber stock—the finest ever offered in a production dangerous game rifle—and is mounted with a single-leaf express sight. Both the Caprivi and Talkeetna have a full-length Mauser claw extractor for true controlled-round feeding and extraction, plus a 3-position safety that is positive, quiet and fast. A barrel band sling swivel stud will not contact the forward hand during recoil. Front sights on both of these rifles are hooded and adjustable for elevation, and both folders remain green for custom regulation. These are the best production dangerous game rifles available, and the game they were designed to hunt deserve nothing less.

VARMINT AND HEAVY BARRELED RIFLES MUST DELIVER pinpoint accuracy with absolute consistency regardless of field conditions. This group of Kimber rifles ensures this level of performance through a combination of match grade components, careful bedding and proper design. Light to heavy, there is a Kimber varmint rifle for any type of predator hunting or varmint shooting. Varmint™ and Pro Varmint™ models are perfect for hunters who move and call. The Varmint configuration has a heavy target stock shaped from ultra-stable laminated wood blanks. Both models have sculpted steel bottom metal with a floorplate release inside the trigger guard, which is both functional and elegant.

KIMBER BUILDS NO-COMPROMISE tactical rifles to help meet the requirements of military or law enforcement professionals. In these arenas, the need for accuracy and dependability takes on a new meaning. Kimber tactical rifles have match grade barrels, chambers and triggers for the highest degree of accuracy. Each action features a full-length Mauser claw extractor for the superior dependability of controlled-round feeding plus an extended bolt handle with an oversized bolt knob for positive operation regardless of field conditions. Advanced Tactical SOC II rifles now ship with a McRee Precision custom stock for Kimber in two color options—FDE and Sniper Gray—they

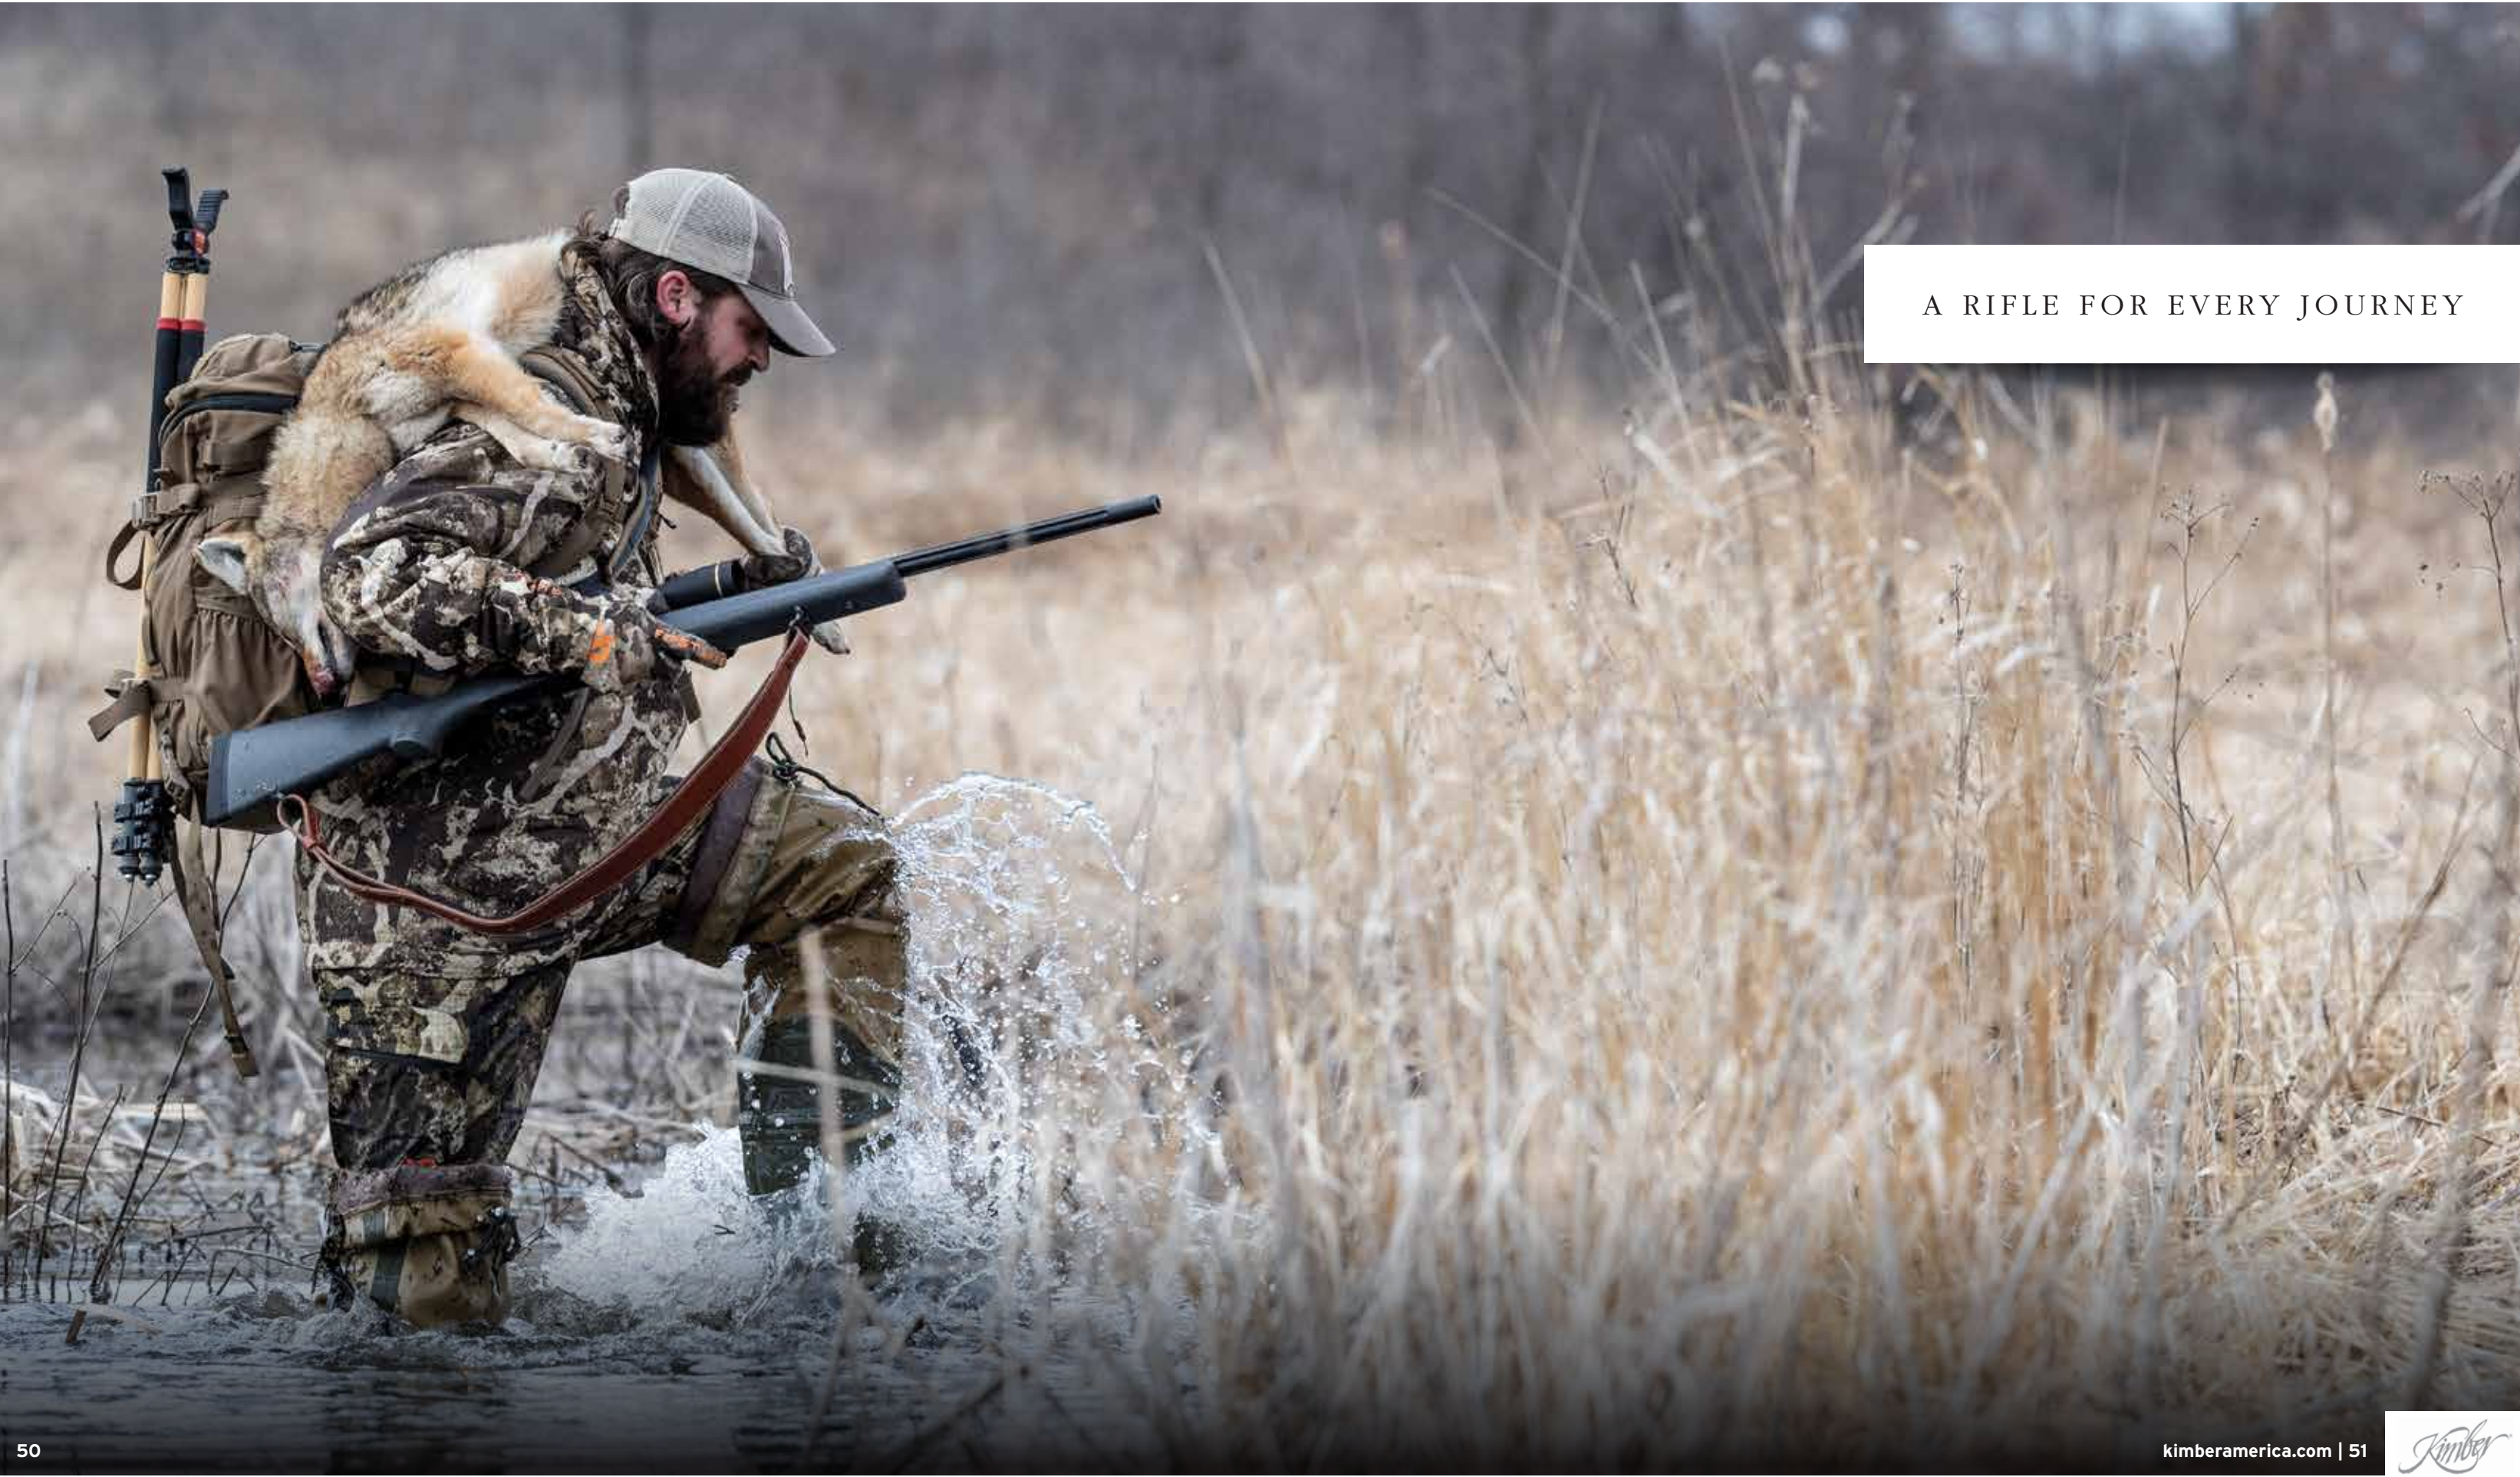

feature a left folding stock that allows for bolt manipulation while folded, a 4-point adjustable cheek weld for a versatile level of personalization, M-LOK® slots, tripod mount, and stock pack. The match grade dimensions of the Advanced Tactical™ SOC II and Advanced Tactical SRC II barrels are verified with an air gauge to ensure accuracy, and every rifle is built by hand, guaranteeing each to have fired 3-shot groups measuring .5 MOA prior to shipping. From a short, light configuration for fast deployment to heavier models with advanced features for long-range precision, Kimber tactical rifles are ready for anything.

SHOOTING A RIMFIRE is an effective way to teach new shooters and enhance the training of others, regardless of their level of experience. Our Rimfire Target Conversion Kit™ (fits 4- and 5-inch barrel models) and Rimfire Compact Conversion Kit™ (fits 3- and 4-inch barrel models) are compatible with

Kimber and most other MIL-SPEC 1911 pistols. Conversion kits are designed to operate with high velocity .22 LR ammunition. Adding a Rimfire Conversion Kit to any 1911 gives you two pistols in one and pays for itself in just a few hundred rounds.

MAGAZINES

Kimber® pistol magazines are available in an assortment of finishes, sizes and calibers. 1911 magazines fit Kimber pistols, plus almost any brand and model of MIL-SPEC 1911. The KimPro® Tac-Mag® is the finest 1911 .45 ACP magazine available today. Each has a quick-change system that permits immediate attachment of three included bases, along with large round count holes that read at a glance.

GRIPS

Kimber offers a full selection of premium grips and Crimson Trace Lasergrips® that fit almost any brand of 1911 pistol, regardless of caliber. Many feature hand-cut checkering and hand finishing. A large variety of grips for our K6s® revolvers are also available through the Kimber Shop.

KIMBER CUSTOM SHOP

The Kimber Custom Shop™ can quickly and professionally modify or personalize any Kimber pistol. Services include installation of night sights, custom finishes, part replacement, checkering, melts, custom parts and tuning.

HOLSTERS

An assortment of fine leather holsters and magazine carriers with the Kimber logo are available for Kimber 1911, Micro™ and Micro 9™ pistols. Kimber holsters also may fit other brands of MIL-SPEC 1911 pistols.

LOGO GEAR

Kimber offers a wide variety of logo apparel and gear, and the selection is always growing. Visit store.kimberamerica.com for a complete presentation.

RIFLE ACCESSORIES

A selection of scopes, mounting systems for any application, along with extended bolt handles, leather logo slings, patterned slings to match your rifles, and other items are available to complete your rifle set up.
